## Manage phone calls

To manage phone calls, the telephone exchange is equipped with a system which allows the drivers to give their position by indicating the area in which they are idle with a vehicle. When a customer asks for a taxi, the operator assigns him or her a vehicle located in the area. If no taxi is in the area, it is necessary to find the closest vehicle.

## Maintain Vehicle

- ❖ An increase in consumption will indicate that the engine need to be checked.
- ❖ The mechanics team takes in charge of the maintenance
