Foreword

Welcome to the CUI

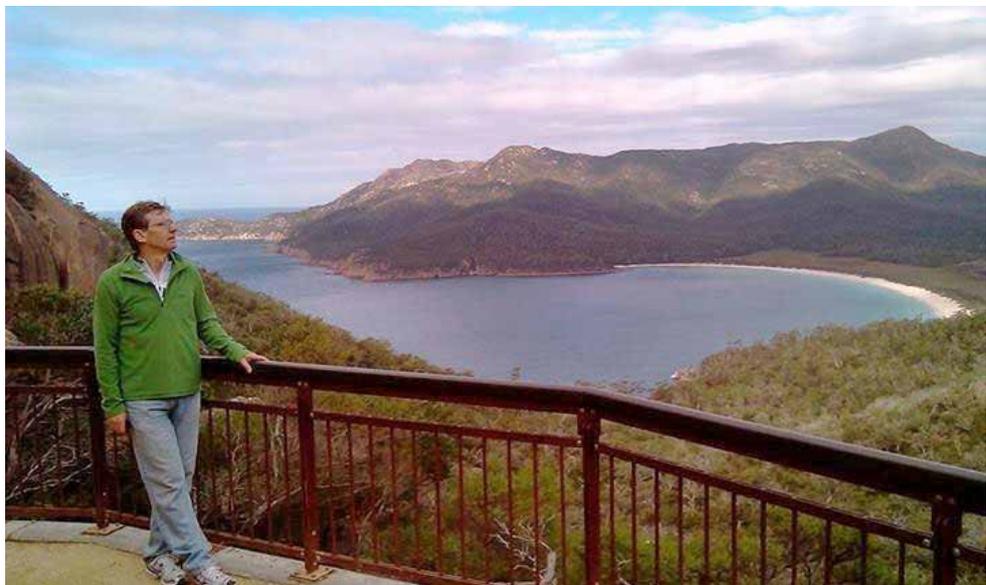

As an interdisciplinary center devoted to teaching and research in computer science, the Centre Universitaire d'Informatique (CUI) is home to more than 120 scientists - including 20 at the professor level - supported by a small but efficient administrative staff of 7 people. CUI collaborators belong to three of the nine faculties of the University of Geneva, the Faculty of Sciences, the Faculty of Humanities and the Faculty of Economy and Management.

As over half of the CUI researchers are on «soft money», the importance of external funding and subsidies cannot be overestimated. In this respect, 2013 has been an excellent year, as we obtained nearly 5m, with approximately 2,6m for Swiss-funded projects and a little over 2,1m for EU-funded projects. This is a clear sign of the excellence of the research conducted in our institution, as well as of its level of recognition. You will find the details of those projects in the following pages.

One of the strong points of the CUI is the richness and the diversity of its research domains, which owes much to its interdisciplinary structure. This is an advantage that we will strive to further exploit and strengthen in the coming years. As a first step, a new MA programme in computer science has started in 2013, bringing together courses from the Department of computer science, the Institute of information science and the unit of computer science for the humanities.

CUI is at a turning point. At the level of both education and research, new projects, new partners, new courses are in the pipeline. I am looking forward to next year's report to present the «new» CUI!

Happy reading

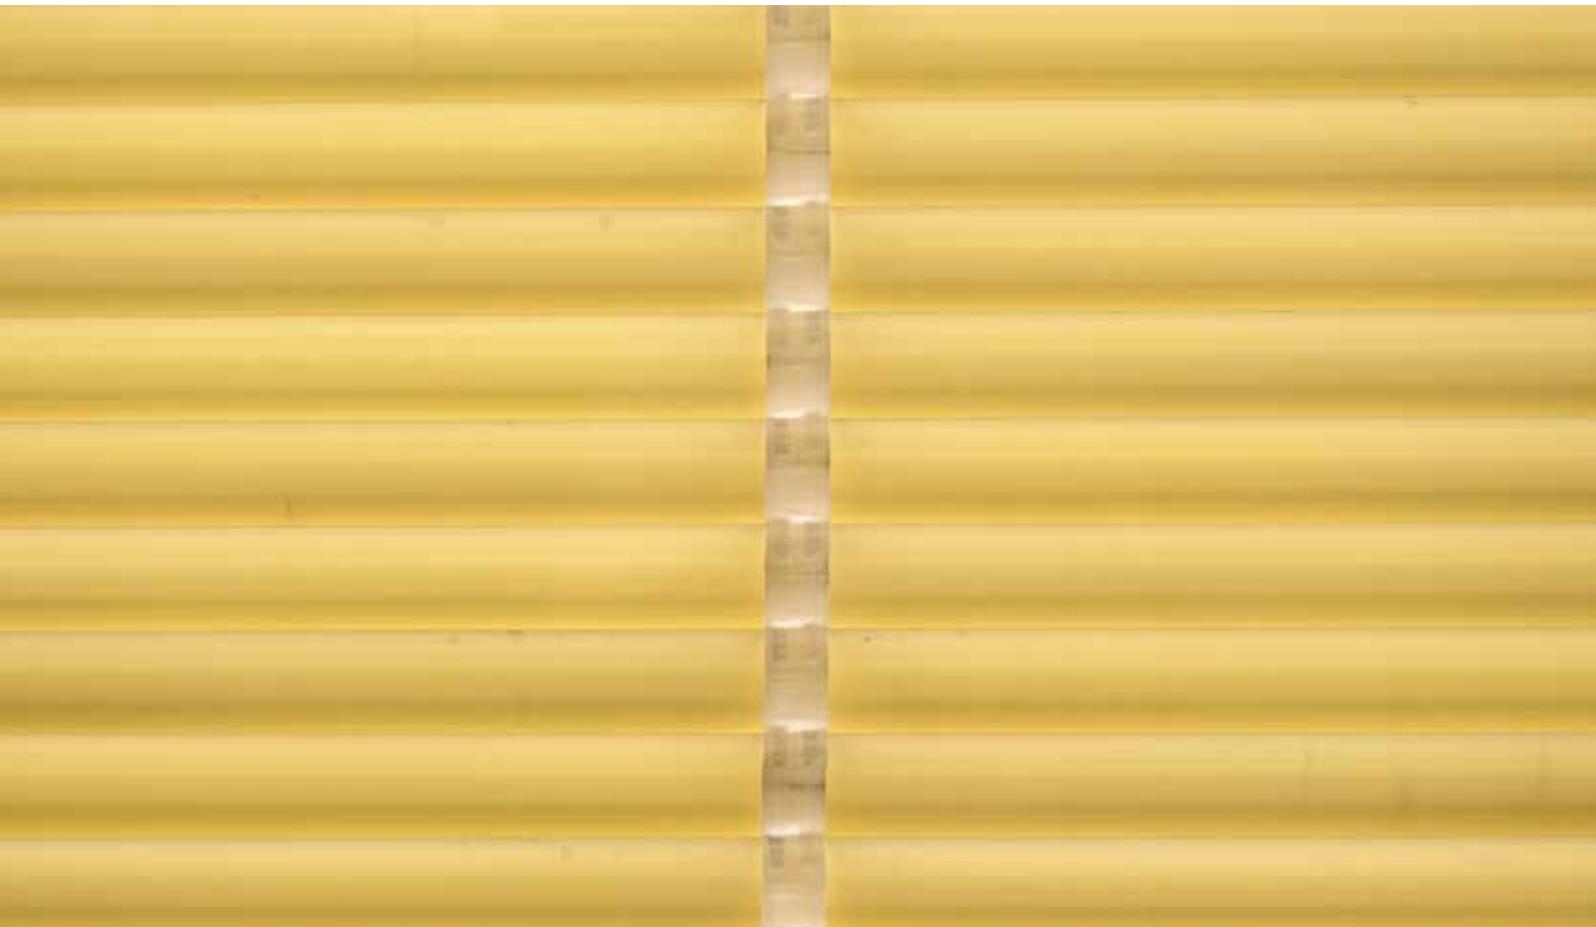

Prof. Eric Wehrli
Director of the CUI

Computational Learning and Computational Linguistics

DOMAIN ACTIVITIES

The Computational Linguistics and Computational Learning (CLCL) Research Group (<http://clcl.unige.ch/>) is an inter-faculty group that brings together academic staff and PhD students based in the Department of Linguistics in the Faculty of Humanities and the Department of Computer Science in the Faculty of Sciences.

The group is concerned with interdisciplinary research combining linguistic modelling with machine learning techniques. The scope of research includes fundamental issues in the statistical nature of language, fundamental issues in machine learning for structured prediction problems, and empirical evaluations that cross these two themes.

Today, machine learning is everywhere, and is one of the most sought-after skill by information technology employers. We apply it to language problems using very large amounts of multi-lingual data.

Our current research includes the development of adaptive data-driven systems for several parsing-based tasks, such as investigations of shallow levels of meaning representations and spoken-language understanding for dialogue systems, large-scale information extraction, and statistical machine translation. These systems span several languages (French, English, German, Italian, Spanish, Japanese, Arabic, Czech, Chinese, Catalan) and for some languages have reached state-of-the-art performance.

These systems are based on our linguistic work on cross-lingual syntactic and semantic parallelism and on machine learning methods based on latent variable models, neural networks and graph-based learning.

The CLCL group gets funding from several Swiss NSF and EU grants. For example,

The EU project PARLANCE is developing the next generation of spoken dialogue systems, using statistical modelling to make them more robust and natural. Our work in this project focuses on incrementally understanding users as they speak, allowing natural fluent interactions with a computer.

The Swiss NSF Sinergia grant COMTIS is extending the capabilities of machine translation technology to include intersentential phenomena, such as pronouns, verb tense, discourse connectives, and register. Our work in this project focuses on

algorithms to efficiently model more linguistically motivated structures in statistical machine translation.

In the Swiss NSF grant for The Grammatical Basis of Linguistics Frequencies: Probabilistic Models of Language Universals we investigate the probabilistic and statistical properties of a set of well-documented typological distributions of sentential word order and word order in the noun phrase. The fundamental research questions we ask is the following: Given what we know from linguistic theory, why are the frequency distributions of these phenomena as they are?

FUNDED RESEARCH PROJECTS

Participation to European projects

PARLANCE

Probabilistic Adaptive Real-Time Learning And Natural Conversational Engine

Period: November 2011 - October 2014.

Granted by EC FP7 area Information and Communication Technologies (ICT)

Partners: Heriot-Watt Univ., Cambridge Univ., Yahoo! Iberia, French CRSA, iSoco. PI for Univ. Geneva.

Web site: <https://sites.google.com/site/parlanceprojectofficial/>

CLCL team in 2012.

Participation to National projects

The Grammatical Basis of Linguistics Frequencies: Probabilistic Models of Language Universals.

Principal Investigator: Paola Merlo

Period: 2013 - 2015

Granted by the Swiss National Science Foundation

Including Semantic Representations from Multiple Data Sources

Principal Investigator: James Henderson

Period: October 2011 - September 2013.

Granted by the Swiss National Science Foundation

Improving the Coherence of Machine Translation Output by Modeling Intersentential Relations.

Swiss NSF Sinergia project

Principal Investigator: Prof. Paola Merlo, James Henderson

Period: March 2010 - February 2013

Computer Vision and Multimedia Laboratory

DOMAIN ACTIVITIES

The **Computer Vision and Multimedia Laboratory** (CVML, <http://cvml.unige.ch>), divided into three groups, carries out research in multimedia data processing, multimedia data management and security, as well as in multimodal human-machine interaction. Research applies to media such as text, audio tracks, sounds, images and videos, and to physiological signals.

Information Retrieval and Machine Learning group (Viper, Prof. S. Marchand-Maillet, <http://viper.unige.ch>): develops strategies for the efficient indexing retrieval and exploration of large-scale information sets. The group studies fundamental machine learning strategies to provide efficient and accurate access to large-scale collections of complex data. Research themes include information, retrieval, recommendation systems, data analytics and exploration. Applications are directed towards information management for multimedia, e-commerce and e-learning.

Stochastic Information Processing group (SIP, Prof. S. Voloshynovskiy, <http://sip.unige.ch>): studies various aspects of information theory and statistical (stochastic) information analysis and processing. The applications mostly cover object identification and authentication based on unclonable object features in large nonstructured databases originating from various imaging techniques, mass-spectrometry and bioinformatics. Current research also concerns privacy preserving search, indexing and multiclass classification.

Multimodal Interaction group (MMI, Prof. T. Pun, <http://cvml.unige.ch/MMI>): studies various forms of interaction between humans, computers, and environment. Some considered interaction modalities are haptic, auditory, and based on physiological signals such as EEGs (electroencephalograms), EMG (electromyograms), blood pressure, galvanic skin resistance (GSR) and skin temperature, breathing rate. Current developments concern: affective state determination and emotion recognition and their use for affective computing, multimodal interaction, brain-computer interfaces, mobility aids for sight handicapped people and for the elderly. Member of the Swiss Center for Affective Sciences. Strong cooperation with faculties of psychology, literature, medicine.

The CVML has various specialized equipment and associated software:

- portable microscope with wireless communications for item identification and authentication;
- Computer cluster of 20 Dual Core 3GHz PCs each with 8 Gb RAM and 500Gb disk, inter-connected with GigaBit Ethernet.
- servers with high storage (overall 5Tb, Raid 5) and processing capabilities (1 Transtec Calleo (2 Xeon Dual Core, 12Gb RAM) and 2 SunFire X4150 (2 QuadCore, 32Gb RAM each), all 64bits architecture).
- Biosemi Active II EEG acquisition system (<http://www.biosemi.com/>) with 64+16 electrodes, with other sensors to record heart rate, GSR, skin temperature, breathing rate, blood pressure, and EMGs;
- Guger Technology gTec gMobilab+ mobile physiological signals recording system (<http://www.gtec.at/>);
- Eckel C14 audiometric research chamber (<http://www.eckel.ca/>) with electromagnetic insulation (Faraday cage), 2.16m x 1.80m x 2.37m;
- eye gaze-tracker QuickGlance 2 (EyeTech Digital Systems);
- head-mounted display Emagin z800;
- stereo cameras: Videre Design STH-MDCS2, Bumblebee CCD BB2-03S2C-60;
- 3D time-of-flight camera SR4000 3D;
- combined 3D time-of-flight + luminance camera PMD CamCube 3.0 200x200 pixels;
- combined 3D + color camera Microsoft Kinect, Lytro, etc.

TECHNOLOGY TRANSFER

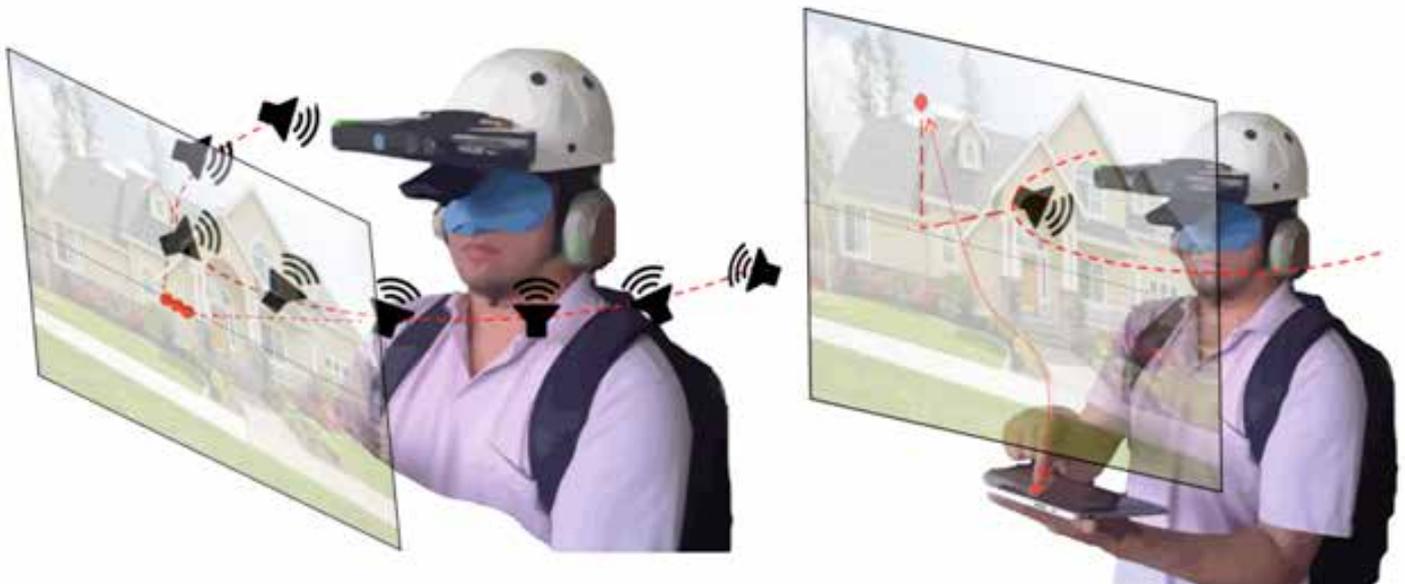

- **Spin-off: Anteleon Imaging S.A.R.L.** (founded August 2003, <http://www.anteleon.com/>), specialized in multimedia documents protection and management, watermarking, authentication and tamper proofing as well as brands protection.
- **U-nica Sytems, AG** (Malans) (<http://www.u-nica.com>) according to Collaborative and Research Agreement between the University of Geneva and U-nica Systems in the domain of physical object protections against counterfeiting based on the University of Geneva patented technology.

CVML team, December 3rd, 2013

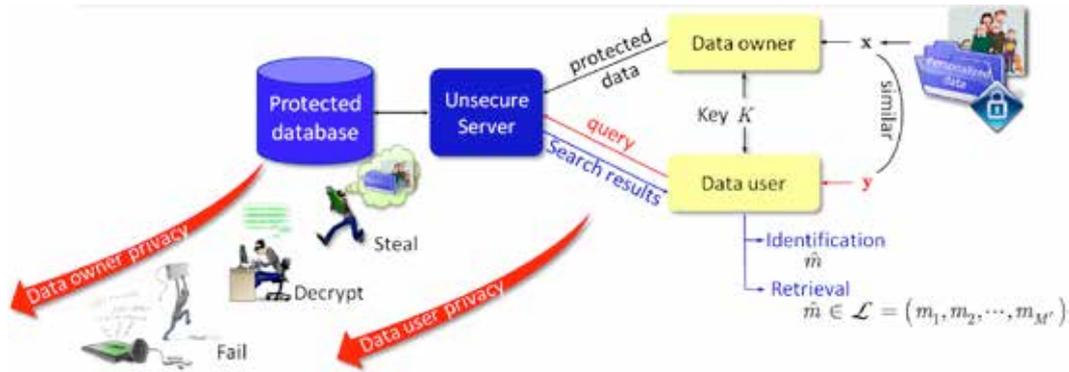

Tactile-sound interfaces would allow unsighted individuals accessing information of an image via touch. The idea underlying here is that a user can hear elements of the real world by pointing (or touching) them with the fingers, as shown in this figure. Ideally, the user needs only to sweep (explore) the real world with his hands and fingers in order to get visual information. In an attempt to reproduce this idea, in See CoLoR we capture the appearance of the real world into an image that is presented to the user through a tactile tablet. Thus, instead of naturally pointing into the real world, See CoLoR's users need to carry a tablet and point (tap) into it in order to explore the sonified visual information. The implementation of this tablet-based interface will be discussed in this section, whereas seminal ideas and early implementations of the ideal model (tablet-free) will be exhibited later in the conclusion section of this work.

(left) The sonification in the local module is illustrated. There are 25 points and 25 sources in this module. To effects of visualization however, only 3 points and 8 sources are respectively displayed. Note that when the row of 25 pixels (points) related to the central part of the image is mapped into sound, it is also augmented to cover the whole azimuth-frontal auditory field. (right) An illustration of the sonification in the global module is presented. Now, only the pixel tapped with the fingertip is sonified. Note that the use of spatialized sounds gives the user awareness of the lateral position of the point (from left to right), which is why in this illustration the source matches the position of the point horizontally though not in elevation. In other words, the source is put down on the azimuth plane, preserving only the horizontal position of the finger on the image. It is well known that rendering elevation is much more complicated than lateralization.

TEACHING

- **Applied cybernetics**, Computer Science, Master, T. Pun and S. Voloshynovskiy, 56h course, 56h practical work, approx. 10 students. 8 ECTS, 10 students.
- **Digital image processing and synthesis**, Computer Science, 3rd year Bachelor, T. Pun, optional for Master and postgraduate students, 56h course and 56h practical work, approx. 20 students. 8 ECTS.
- **Introduction to algorithms**, Computer Science, 1st year Bachelor, 56h course, 28h exercises and 56h lab work, approx. 30-40 students.
- **Advanced image processing**, Computer Science, Master, postgrades, 28h. course and 28h. practical work, approx. 8 students.
- **Elements of information theory**, Computer Science, 2nd year Bachelor, Master, postgrades, 28h. course and 28h. practical work, approx. 25 students.
- **Multimedia security**, Computer Science, Master, postgrades, 28h. course and 28h. practical work, approx. 8 students.
- **Information Retrieval**, Computer Science, Master, postgrades, 28h. course and 28h. practical work, approx. 15 students.
- **Information Analysis and Processing**, Computer Science, Master, postgrades, 28h. course and 28h. practical work, approx. 25 students.
- **Elements of multiuser information theory and wireless communications**, Computer Science, Master, postgrades, 28h. course and 28h. practical work, approx. 10 students.
- **Data Structures**, Computer Science, 1st year Bachelor, 56h. course and 56h. lab work, approx. 20 students.
- **Hands-on Programming (practical complement to Data Structures)**, 1st year Bachelor. 56h Practical work, 20 students.
- **Computer Science Project**, Computer Science, 3rd year Bachelor, 28h course and 56h. lab work, approx. 10 students.
- **Industrial Internships**, Summer Semester (3 months supervision), 5 students.
- **Weekly Computer Vision and Multimedia seminars**, graduate students and senior researchers, 1h. per week, about 15 PhD students, post-docs, seniors, visitors.
- **Data Mining**, Computer Science, Bachelor, 28h course and 28h. lab work, 4 ECTS.

DOMAIN ACTIVITIES

Services represent the most growing sector of the economy in industrialized nations. Services science is arising from the rapid development of services across the industrial world and the need to analyze and study the organization, deployment, maintenance and operation of those related IT based and IT supported services. Services Science represents an interdisciplinary approach to the systematic innovation in service systems, integrating management, social, legal and engineering aspects.

The Institute of Services Science is a research institute of the Faculty of Economic and Social Sciences of the University of Geneva. Our mission is to engage with industry, public administration and the public in order to lead and shape the international landscape of research in the domain of Services Science.

As a team of 60 staff members, we are active in **research, technology watch, creativity** and **teaching**. We are currently participating in 28 research projects (EU/Cost/Swiss funding). Our major areas of research cover e-Health, pervasive computing, indoor positioning and indoor navigation, object localisation, mapping, GIS, mobile sensors analysis, security and privacy, risk and compliance, service level agreements, cloud computing, Internet of Things, service innovation, formal methods and design, systems evolution, quality and interoperability, autonomous and self-adaptive systems, trust-based systems and data science and predictive analysis. Application domains include transdisciplinary business services, Ambient Assisted Living, services for mobile users, travelling and mobility, gaming, data protection, intelligent documents, digital rights and policy management, e-government services and smart society, finance and banking services.

Our strong involvement in interdisciplinary think groups places us at the forefront of the technology watch in Services Science in Switzerland. We regularly contribute to creativity and innovation hands-on experiments targeted at industry. In collaboration with the HEC Business of School of the Faculty, we also participate to a full range of academic programs in Services Science (BSc, Msc, Executive MSc and PhD).

Our international network includes many academic institutions, public administrations, creativity and innovation consultants, think tanks and services providers across Europe, Asia, North America.

Relevant Facts about ISS in 2013:

- LIFTAcademia: workshop within the LIFT Conference (Jan 2013)
- TEDxCERN@CUI: retransmission of TEDxCERN event (May 3rd)
- 2 ISS teams (QoL & TaM) among the winners of the TPG challenge

Giovanna Di Marzo Serugendo - Autonomous Adaptive Systems

The research activity around Autonomous Adaptive Systems focuses on the engineering of autonomous systems and services, in particular spontaneous composition of services, self-organising, self-adaptive and large-scale services. We are exploring reliability and controllability issues (how to build a reliable and trustworthy adaptive services that is controllable); properties and formal methods issues (how formal methods can help for proving properties of adaptive systems); and developing decentralised algorithms. Considered applications areas are: autonomous displays, crowd steering, smart environments, ecosystems of services, services for mobile users and dynamically resilient systems, privacy embedded into the design.

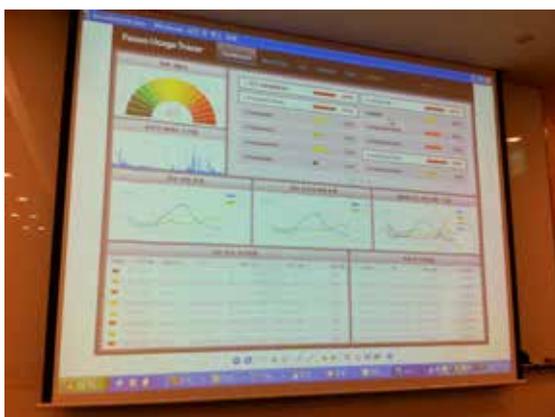

Figure 1: Fasoo Usage Tracer dashboard (Exception Management)

Jean-Henry Morin - Digital Rights & Policy

As our society and economy is increasingly interwoven with digital services and systems, our research activities continue to investigate some of the complex challenges and issues towards a more sustainable and responsible digital society. The area of Digital Rights & Policy Management at large focuses on the study and design of new approaches, services and methods to help solve wicked and messy problems in this digital society. Specific projects and activities cover topics in :

- Exception management in DRM environments (Enterprise and Media sectors)
- Governance, risk and compliance (GRC)
- Legal awareness services and interfaces
- Socialization of Things and Empowerment in Internet of Things (IoT)
- Cloud Computing and Service Level Agreements (SLA)
- Service Innovation and Design
- Service tangibilization, compliance and governance
- Rights and Policy interface design
- Data protection and transparency
- Information security and assurance

Dimitri Konstantas - Mobile services

Mobile services and applications are today an indispensable part of our daily life. We are using our mobile phones and PDAs to access our mail, chat with friends and colleagues, take and store photographs and videos, obtain guidance and route information, play games and even access the internet. However, the fact that mobile services and applications are part of our daily life does not mean that all problems and issues are resolved. From one side, existing mobile services and applications operate under a “best effort” model, handling issues like Quality of Service, trust and security in a case to case basis employing ad-hoc solutions, while from the other side we are desperately lacking applications and services for several groups of users, like for example the elderly.

Since 2009 we have been applying the results of our fundamental research in QoS, trust, mobile devices' interoperability (mobile server cloud) in the study and development of services for the aging society. In this context we have succeeded acquiring 4 European projects in the Ambient Assisted Living (AAL) program. Our work in this domain concentrates in the study of lifestyle of senior persons (age 65 and more) and the creation of mobile location aware services for monitoring the activities of the users and providing them proactive information regarding activities to do (realising the basic directive for senior persons : do not stay inactive), putting them in contact with other users with similar interests (socialisation), providing them the means for getting help from formal and informal care givers, and even advising them on diet and exercise. In this projects we collaborate with local (Geneva based) industrial partners that are offering services for seniors.

Michel Léonard - MATIS (Management and Technology of Information Services)

The Society/Company seems to become fully servitized. This trend induces huge fields of services to be immersed, and discovered. Consequently, a lot of human and collective activities will be interwoven with artificial activities, and one major concern about such a Society/Enterprise development depends on the quality of these interwoven activities. So, following our research approach in information systems, we centre our research on information – and not on software, like Web services – to explore activities emerging or transformed in enterprises or e-government, and to discover actionable knowledge, relevant to these servitized situations. Thus, we explore appropriate:

- Company organisations taking into account initiatives, responsibility,
- Design methods taking into account adaptability, agility, composition, compliance with rules,
- Information base management systems (Ksterix),
- Transdisciplinary environments,
- Company evolution through IS evolution by means of services.

Thus, we work on the creation of Tiers-Lieux in the context of a new emerging kind of economy: the contributory economy. They will provide cognitive cross-pollination spaces for developing large services requiring multidisciplinary, multi-institutional, notably public and private, researchers and practitioners, in order to face the intricate situations, for instance with Big Data, Open Data, Smart Region. It is an interconnected grid of activities, platforms and methods aiming at accelerating exploration, development and market validation of new services. It will enable students and researchers to express, model and experiment specific requirements, and to be immersed in real situations.

Nadia Magnenat-Thalmann - MIRALab

MIRALab was founded in 1989 by Professor Nadia Magnenat-Thalmann and has brought together PhD students and researchers from different fields, such as computer science, 3D graphics, 3D simulation, social robotics, 3D fashion design, and cognitive science. This truly interdisciplinary group continues to work in the field of medical informatics, virtual worlds and virtual humans .

Since 1992, MIRALab has participated in more than 50 European Projects and contributes to the management of two International Conferences, CASA and CGI. Moreover, MIRALab produces 3D showcases for museums, galleries, such as fashion shows with virtual models and clothes. In 2013, MIRALab was working on the following projects: 3D LIFE, AERIAL CROWD, EMC2, MULTISCALEHUMAN, REPLAY, ITN-DCH and ANINEX.

INTERNATIONAL AND NATIONAL ADVISORY COMMITTEES

Jolita Ralyté:

- Since 2012: Steering Committee Member: CAiSE – International Conference on Advanced Information Systems Engineering

Nadia Magnenat-Thalmann:

- 2013: Member of the Scientific Council of the Institute of Mines-Telecom, Paris, France
- 2013: Expert on the advanced grant panel of the European Research Council (ERC)
- 2013: Expert for the French Research Agency, Paris (COMINT)
- 2007-2013: Expert and reviewer of the Seventh Framework Programme FP7, European Commission
- Since 1994: President of the Computer Graphics Association (CGS)

INTERNATIONAL AND NATIONAL RESEARCH PROGRAMS COMMITTEES

Giovanna Di Marzo Serugendo:

- Since 2011: Member: Comité de Direction, CADMOS
- Since 2011: Member: Programme Doctoral Romand d'Informatique (CUSO)
- 2012: Expert evaluator: Lecturership positions, University of Stockholm
- 2012: Audit evaluator: Luxembourg ministry of education
- Since 2012: Member: Commission de renouvellement HEC, Faculty of Economic and Social Sciences, University of Geneva
- Since 2011: Programme Director: MSc in Management -

- Option Information Systems and Management
- Since 2011: Programme Director: PhD Programme in Information Systems and Management

Dimitri Konstantas:

- Since 2004 : Expert Evaluator for the Commission of the European Union
- Since 2005 : Expert evaluator for the Canadian National research foundation
- Since 2009: Expert evaluator for the Greek Ministry of Education
- Since 2002: Expert evaluator for the Dutch National research foundation
- Since 2002: Member of the eMobility ETP
- Since 2005: Founding member and associate director of the ERCIM eMobility WG
- Since 2005 : Founding member of IICREST (Sofia, Bulgaria)

Jean-Henry Morin:

- Evalueateur pour le fonds de science et technologie de Vienne, Autriche.
- Membre du jury du concours Open Data TPG (Transports Publics Genevois), Genève, 18 sept - 22 nov 2013.
- Co-founder and board member of the Cloud Security Alliance (CSA) Swiss chapter, responsible for academic relations, April 2013.
- Co-founder and President-Elect of the Association for Information Systems (AIS) Swiss chapter, June 2013.
- Membre du Conseil Scientifique de La Muse, Fondation pour la Créativité Entrepreneuriale (FCE), Genève.
- Animation d'un atelier de sensibilisation à la vie privée et au numérique, dans le cadre du programme Elargis tes Horizons pour faire découvrir aux filles de 11 à 14 ans les métiers scientifiques. Université de Genève, 14 novembre 2013.

- Participation au TecDay au Collège Emilie-Gourd sur le thème de la protection des données et la transparence, organisé par l'Académie Suisse des Sciences Techniques (SATW), Genève, 5 nov 2013.

Jolita Ralyté:

- 2013: Expert Evaluator for the Research Council of the University of Leuven, Belgium

Jean-Marc Seigneur:

- Expert Evaluator for the European Commission
- Expert Evaluator for the US Air Force Research
- Expert Evaluator for the European Research Council
- Expert Evaluator for the French National Research Agency
- Expert Evaluator for the Swiss National Science Foundation
- Expert Evaluator for the Australian Research Council
- Expert Evaluator for the Portuguese Foundation for Science and Technology
- Expert for the European Union Agency for Network and Information Security

Katarzyna Wac:

- Expert Evaluator for the research projects submitted to Fondazione Cariplo, Italy
- Evaluator for the Partnership Programme - Joint Applied Research Projects (PCCA), Executive Agency for Higher Education, Research, Development and Innovation Funding, Romania

PHD THESIS COMMITTEES

Giovanna Di Marzo Serungendo:

- External Examiner: Franck Gechter. Systèmes multi-agents réactifs d'inspiration physique pour la prise de décision et la résolution de problèmes. HDR, Belfort-Montbéliard, France, 2013
- President Jury, External Examiner: Nicolas Brax. Self-adaptive multi-agent systems for aided decision-making: an application to maritime surveillance. Université Paul Sabatier, Toulouse, France, Décembre 2013

Figure 9: Context-aware information flow

- Examiner: Alexis Marechal. Unifying the syntax and semantics of modular extensions of Petri Nets. University of Geneva, July 2013.
- External examiner: Noélie Bonjean. Auto-organisation de fragments pour la conception de processus de développement. Université Paul Sabatier, Toulouse, France, Mars 2013
- External examiner: Andrei Pruteanu. Computing in Large Scale Dynamic Systems. University of Delft, April 2013
- External examiner: Mohamed Bakhouya. Adaptive Approaches for Pervasive Systems. HDR. University of Haute-Alsace, France, May 2013

CONFERENCE ORGANIZATION AS CHAIR OR CO-CHAIR

Jose Luis Fernandez Marquez:

- Publicity Chair: IEEE International Conference on Self-Adaptive and Self-Organizing Systems, Pittsburgh, September 2013
- Co-chair: ACM SAC 2013 - Track on Coordination Models, Languages and Applications.

Verena Kantere:

- Co-organizer of the 1st Workshop on SLA Data Services co-allocated with the 17th East-European Conference on Advances in Databases and Information Systems (ADBIS 2013).

Abdelaziz Khadraoui:

- Program Chair: The 2nd International Conference on Software Engineering and New Technologies Hammamet, Tunisia, December 21-23, 2013.

Michel Léonard:

- Steering chair: International Conference on Exploring Services Science

Jean-Henry Morin:

- Co-chair of the Secure Cloud Computing minitrack, Hawaii International Conference on System Sciences, HICSS-46, Hawaii, January, 2013.

Jolita Ralyté:

- Doctoral Consortium Chair: RCIS 2013 – 7th IEEE International Conference on Research Challenges in Information Science, May 29-31 2013, Paris, France.
- Track Co-Chair: ECIS 2013 – 21st European Conference of Information Systems, Utrecht, The Netherlands, June 5-8, 2013. Track on Methods, Tools and Human Factors in IS/IT Development and Management.
- Track Co-Chair: INFORSID 2013 – 31ème Congrès Informatique des Organisations et Systèmes d'Information et de Décision, Paris, France, May 29-31, 2013. Track on Methods and Creativity for Information Systems Engineering.

Jean-Marc Seigneur:

- Co-Chair of the Trust, Reputation, Evidence and other Collaboration Know-how Track, SAC, ACM.
- Publication Chair of the 4th Augmented Human International Conference, ACM.

Katarzyna Wac:

- Co-organizer of the «Workshop on Service Science for e-Health» (SSH) at the International Conference on e-Health Networking, Application and Services, Oct 2013 (IEEE HealthCom 2013)

MEMBER OF CONFERENCE PROGRAM COMMITTEES

Giovanna Di Marzo Serugendo:

- IEEE International Conference on Self-Adaptive and Self-Organising Systems, Pittsburgh, 2013 (SASO'13)
- ERCIM Workshop on Software Engineering for Resilient Systems, Kiev, Ukraine, September 2013 (SERENE'13)
- 10th European Dependability Computing Conference (EDCC'14)
- 13th International Conference on Autonomous Agents and Multi-Agents Systems, Demo Tracks (AAMAS'14-Demo track)
- International Workshop on Bio-Inspired Computing (BioCom'13)

Jose Luis Fernandez-Marquez:

- IEEE International Conference on Self-Adaptive and Self-Organising Systems, Pittsburgh, 2013 (SASO'13 Demos)
- UncertaintyAml 2013 - 1st International Workshop on Uncertainty in Ambient Intelligence.

Verena Kantere:

- International Conference on Extending Database Technology (EDBT) 2013.
- Hawaii International Conference on Systems Science (HICSS) 2013.
- International Conference on Scientific and Statistical Database Management (SSDBM) 2013.
- International Conference on Web Information System Engineering (WISE) 2013.
- Hawaii International Conference on Systems Science (HICSS) 2014.
- International Conference on Extending Database Technology (EDBT) 2014.
- ACM International Conference of Special Interest Group on Management Of Data (SIGMOD) 2014.
- Intern. Workshop on Elasticity Measures for Software-Defined Environments, (col. with ICDCS) 2014

Abdelaziz Khadraoui:

- International Conference on Computer Medical Application (ICCA'2013), Sousse, Jan 1, 2013

- International Conference on Information Systems and Technologies (ICIST'2013), Morocco, March, 2013.
- International Conference on Software Engineering and New Technologies (ICSENT'2013), Hammamet, Tunisia, December 21-23, 2013

Michel Léonard:

- IESS *13, CAISE*2013, ICEIS 2013

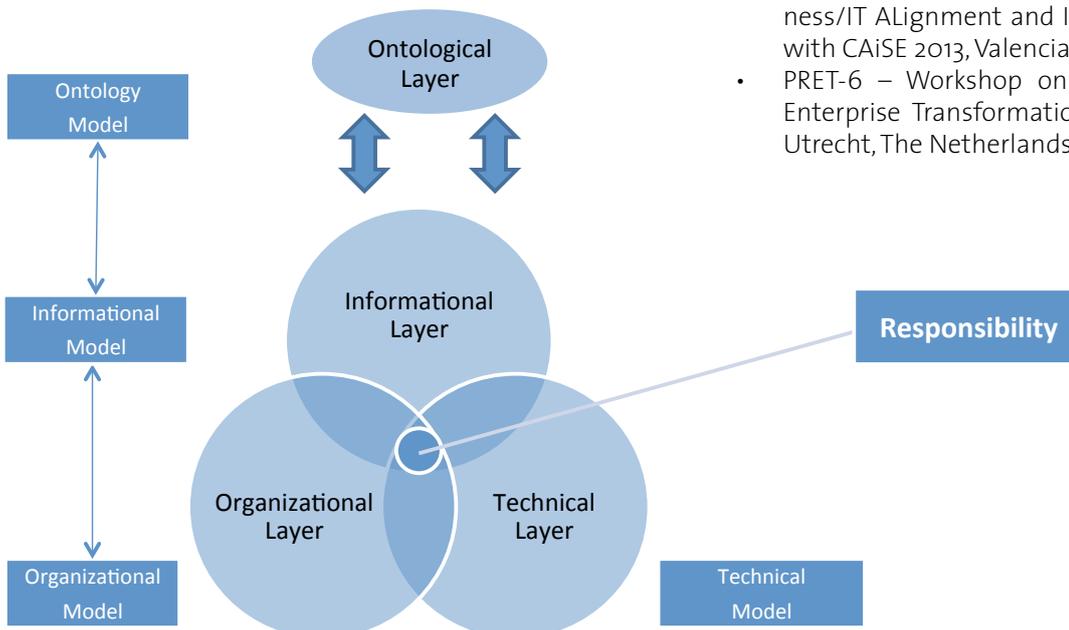

Jean-Henry Morin:

- PC member Eighth International Conference on Internet Monitoring and Protection, (ICIMP 2013), June 23 – 28, 2013, Rome, Italy.
- PC member of the 3rd International Conference on Exploring Service Science, IESS 1.3, Feb. 2013, Porto, Portugal.

Jolita Ralyté:

- CAISE'13 – 25th International Conference on Advanced Information Systems Engineering, Valencia, Spain, June 17-21, 2013.
- RCIS 2013 – 7th IEEE International Conference on Research Challenges in Information Science, May 29-31 2013, Paris, France.
- ER 2013 – 32nd International Conference on Conceptual Modeling, Hong Kong, November 11-13, 2013.
- REFSQ 2013 – 19th Working Conference on Requirements Engineering: Foundation for Software Quality, Essen, Germany, April 8-11, 2013.
- EMMSAD 2013 – International Conference on Exploring Modeling Methods in Systems Analysis and Design, Valencia, Spain, June 17-18, 2013.
- ICEIS 2013 – 15th International Conference on Enterprise Information Systems, Angers, France, July 3-7, 2013.
- IESS 2013 – 4th International Conference on Exploring Services Science, Porto, Portugal, February 7-8, 2013.
- ECIS 2013 – European Conference of Information Systems, Utrecht, The Netherlands, June 5-8, 2013.
- PoEM 2013 – 6th IFIP WG8.1 Working Conference on The Practice of Enterprise Modeling, Riga, Latvia, November 6-7, 2013.
- INFORSID 2013 – 31ème Congrès Informatique des Organisations et Systèmes d'Information et de Décision, Paris, France, May 29-31, 2013.
- BUSITAL 2013 – International Workshop on on BUSInness/IT Alignment and Interoperability. In conjunction with CAISE 2013, Valencia, Spain, June 17, 2013.
- PRET-6 – Workshop on Practice-driven Research on Enterprise Transformation, collocated with ECIS 2013, Utrecht, The Netherlands, June 5-8, 2013.

Figure 10: Responsibility Aspects in Service engineering

“ Can I use the data from my clients / users at the end of the surveys? ”

Figure 11: ThinkData home page (<http://thinkdata.ch>)

- IEEE CBI 2013 – 15th IEEE Conference on Business Informatics, Vienna, Austria, July 15-18, 2013.
- BMSD 2013 – 3rd International Symposium on Business Modeling and Software Design, Noordwijkerhout, The Netherlands, July 8-10, 2013.
- RIGIM 2013 – 5th International Workshop on Requirements, Intentions and Goals in Conceptual Modeling. In conjunction with ER 2013, Hong Kong, November 11-13, 2013.
- SoEA4EE 2013 – 5th International Workshop on Service-oriented Enterprise Architecture for Enterprise Engineering, Vancouver, Canada, September 9, 2013.

Jean-Marc Seigneur:

- ACM Symposium of Applied Computing 2013
- ACM Augmented Human International Conference 2013
- IFIP Trust Management International Conference 2013

Katarzyna Wac:

- Reviewer for the 9th International Conference on Network and Service Management (CNSM 2013)
- 4th International Wireless Health Conference (Wireless-Health 2013)
- Reviewer for the 15th International ACM Conference on Ubiquitous Computing (UbiComp 2013)
- Location-based services for Indoor Smart Environments (LISE 2013) collocated with IPIN 2013
- Symposium on Smart Environment Technologies at the IEEE International Conference on Software, Telecommunications and Computer Networks (IEEE SoftCOM 2013)
- 2nd International Workshop on Ubiquitous Mobile Instrumentation (UbiMI) collocated with UbiComp 2013
- International Workshop on Pervasive Participation (PerPart 2013) collocated with the 6th Int. Conf. on Communities and Technologies
- International Workshop on Behavior Change Support Systems (BCSSs) collocated with the 8th International Conference on Persuasive Technology (PERSUASIVE 2013)
- International Conference on Mobile Web Information Systems (MobiWIS 2013)

INVITED TALKS

Michel Deriaz:

- CREG (Centre de Rencontre des Entrepreneurs - Genève), “Maprika”, Geneva, January 2013
- CREG (Centre de Rencontre des Entrepreneurs - Genève), “Cobian Backup”, Geneva, February 2013
- CREG (Centre de Rencontre des Entrepreneurs - Genève), “Hoax”, Geneva, March 2013
- CREG (Centre de Rencontre des Entrepreneurs - Genève), “Cryptology”, Geneva, May 2013
- CREG (Centre de Rencontre des Entrepreneurs - Genève), “How to select a good password”, Geneva, June 2013
- CREG (Centre de Rencontre des Entrepreneurs - Genève), “Wiping HD, PGP”, Geneva, September 2013
- CREG (Centre de Rencontre des Entrepreneurs - Genève), “Duplicate cleaner”, Geneva, October 2013
- CREG (Centre de Rencontre des Entrepreneurs - Genève), “Privazer”, Geneva, November 2013
- CREG (Centre de Rencontre des Entrepreneurs - Genève), “Se faire offrir sa R&D”, Geneva, December 2013

Giovanna Di Marzo Serugendo:

- Panelist, WSIS+10 High-Level Event, Geneva, ITU, 2013
- Speaker at High-level Dialogue. ICT Innovations and Standards: Creating technology for the next three billion. World Summit for Information Society. WSIS Forum 2013, Geneva, ITU.
- Self-protected content – University of Delft, May 2013.
- Privacy by design – prix des préposées cantonales à la protection des données et transparence, Geneva, February 2013

Verena Kantere:

- Data Center for Astrophysics, ISDC on the 10/04/2013
- University of Lugano on the 24/04/2013

Jean-Henry Morin:

- Panelist au Café Scientifique sur le thème « Facile / pas facile... de se faire surveiller », association bancs publics, Musée d’histoire des sciences, Genève, 16 décembre 2013.

- Conférencier invité à l'occasion de la remise du Prix 2013 d'encouragement à la protection des données et à la transparence sur le thème : Protection et Contrôle de l'Information : Enjeux et Perspectives Sociotechniques, Genève, 9 décembre 2013.

Katarzyna Wac:

- Smartphone as a Personal Pervasive Health Information Services Platform, The International Conference on Using Advanced Technologies for Elderly Care: A New Paradigm (ElderlyTech 2013), Tel Aviv, Israel, Feb 2013
- mQoL Living Lab: Experience of Running Longitudinal Studies for Mobile Internet Measurements, «News and Community Feedback Session», Internet Measurement Conference, Barcelona, Spain, Oct 2013.

Nadia Magnenat-Thalmann:

- Invited talk at Virtual Humans and Cognitive Modeling Workshop, Interacting with Virtual Characters and Social Robots, Institute for Media Innovation, Singapore, April 26, 2013
- Invited talk at Workshop on 3D Displays and Related Technologies, Interacting with Social Robots and Virtual Humans, Nanyang Executive Centre Auditorium, Singapore, February 4, 2013

REFEREING

EDITORIAL RESPONSABILITIES

Giovanna Di Marzo Serungendo:

- Editorial Board Member: Multiagent and Grid Systems - An International Journal. ISSN: 1574-1702.
- Editorial Board Member: International Journal of Intelligent Information and Database Systems. I n d e r - Science.
- Editorial Board Member (2013 -) - TCAASA

Figure 12: X-risk for Finma BCP Implementation (Financial Activities)

Jose Luis Fernandez-Marquez & Giovanna Di Marzo Serugendo:

- Guest Co-editor (2014). Special issue on Self-Organising Coordination in Science of Computer Programming (SCP)

Abdelaziz Khadraoui:

- Associate Editor, International Journal on Information Systems and Technologies (IJIST), 2012.

Laurent Moccozet:

- Editorial board member (2009-) revue Technique et Science Informatiques publié par les éditions Hermès-Lavoisier
- Editorial board member (2011-) International Scholarly Research Network Computer Graphics

Jean-Henry Morin:

- Associate Editor for the 22nd European Conference on Information Systems (ECIS 2014), IS Security and Privacy track, June 9-11, 2014, Tel-Aviv, Israel.
- Editorial board member of the Journal of Service Science Research (JoSS), ISSN: 2093-0720, Springer, Journal no. 12927, since 2009.
- Editorial board member of the International Journal On Advances in Systems and Measurements, ISSN: 1942-261x, IARIA, since 2008.

Jolita Ralyté:

- Editorial Board Member (2009 -): IJISMD – International Journal of Information Systems Modeling and Design
- Editorial Board Member (2010 -): IJISSS – International Journal of Information Systems in the Service Sector
- Special Issue Editor: IS - Information Systems Journal, Special Issue on Advanced Information Systems Engineering (to appear in 2014)

Nadia Magnenat-Thalmann:

- Since 2000 Editor-in-chief of the Journal “The Visual Computer” published by Springer Verlag, Germany.
- Since 1995 Editor, Computational Geometry Journal, Elsevier, North Holland.
- Since 1990 Co-founder and Co-editor-in-chief, “Journal of Visualization and Computer Animation”, John Wiley and Sons.

Katarzyna Wac:

- Special Issue Editor: Rawassizadeh, R., K. Wac, and M. Tomitsch, Theme Issue on Electronic Memories and Life Logging, Journal on Personal and Ubiquitous Computing, Springer, 17(4):603-604, April 2013.
- Special Issue Editor: Swiatek, P., Wac, K., Martini, M., Patrick, K., Special Issue on Service Science for e-Health, IEEE Journal of Biomedical and Health Informatics, (forthcoming 2014)

WORKING GROUPS / STANDARD BODIES PARTICIPATION

Giovanna Di Marzo Serugendo:

- IEEE CIS Task Force on Terminology and Taxonomy – Member
- IEEE ETTC Organic Computing Task Force – Member
- ERCIM SERENE Working Group – Member

Jean-Henry Morin:

- ThinkServices, ThinkTank on Services Science and Innovation, President, Since 2010.

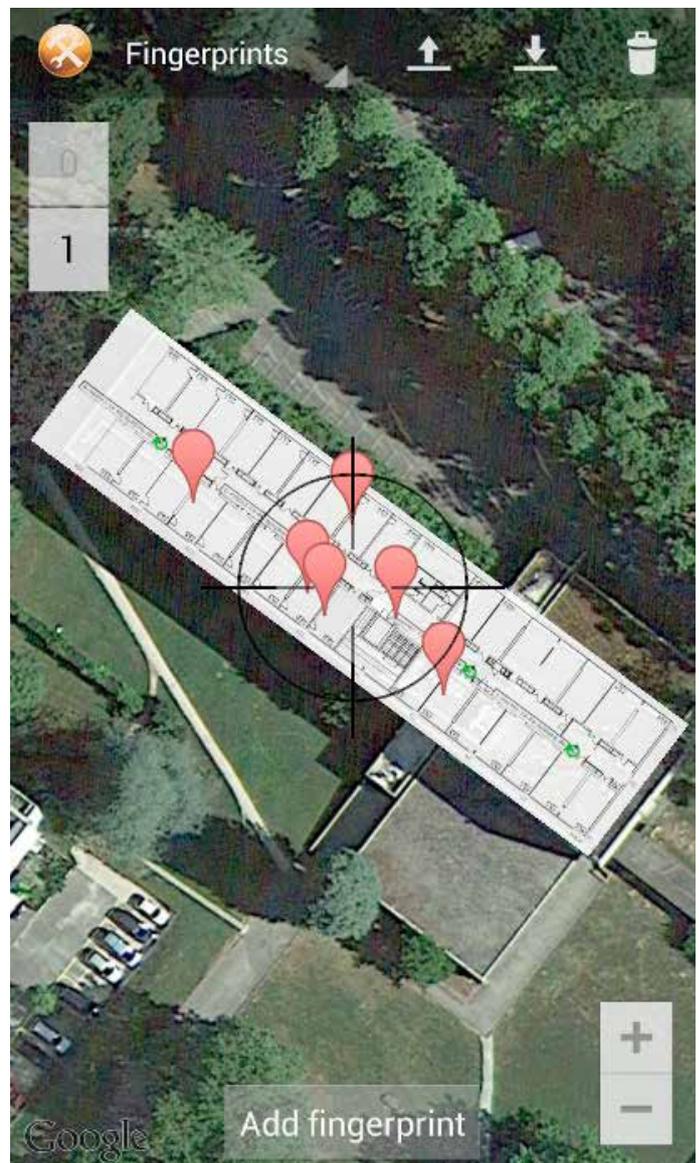

Figure 13: Indoor geolocation

- Chair of the Data, Society and Transparency ThinkGroup within ThinkServices, since 2011.
- Member of the steering committee of the University of Geneva Web portal project, since 2011.
- Member of University of Geneva commission du personnel, since 2012.
- Co-director with Laurent Moccozet of the bachelor program in Information Systems and Services Science, SES Faculty, University of Geneva, since 2011.

Jolita Ralyté:

- IFIP WG 8.1: Design and Evaluation of Information Systems – Vice-Chair (2010 - 2015), Member since 2004.
- AIS – Association of Information Systems – Member since 2010.

Katarzyna Wac:

- Associate Expert of the International Telecommunication Union (ITU) European Regional Initiative for mHealth (since 2012).

EVENTS

Jean-Henry Morin:

- Co-organiser of the Open Knowledge Conference 2013 Legal Hack Day, « From Code to Sense : Bringing the Law to the Public - Law Mining Hackathon », 16-19 September 2013, CICC & CUI Open Innovation Lounge (CUI-OIL), Geneva, Switzerland.
- Organisation de la conférence du Prof. Seang-Tae Kim, The 4th Wave of Smart Revolution: Government 3.0 in Smart Society, suivi d'une table ronde sur le thème eGov et Société Numérique. Université de Genève, 6 novembre 2013.
- Atelier sur les Aspects techniques de la mise en oeuvre du droit à la protection des données personnelles, sixième Journée suisse du droit de la protection des données sur le thème du « droit à l'autodétermination informationnelle », Université de Fribourg, Faculté de Droit, 7 juin 2013.
- Organisation du Simulcast du TEDxCERN au Centre Universitaire d'Informatique (CUI-OIL), Genève, 3 mai 2013
- Organisation de deux conférences, 2012 et 2013, à l'IDHEAP (Lausanne) à l'occasion des Journées de la Protection des Données, avec le bureau du Préposé fédéral à la protection des données et à la transparence. 28 janvier 2012 : Lancement du service ThinkData et conférence de M. Jean-Philippe Walter, Préposé fédéral suppléant, sur le thème - Risques et enjeux des technologies pour les droits et libertés fondamentales. 27 janvier 2013 Conférence du Prof. Ebrahimi Touradj, EPFL sur le thème de la vidéo surveillance - A la recherche d'un «Big Brother» protecteur mais respectueux de ma sphère privée! Suivi d'une table ronde et du lancement de la version 2 de ThinkData repris officiellement par le bureau du préposé fédéral à la protection des données et à la transparence.

Katarzyna Wac:

- Co-organization of the «Quantified Self & Quality of Life Seminars series» since 2012 (2013 schedule: 20 Feb, 25 Apr, 11 Jun, 11 Sep, 27 Nov, Speakers: Mr Clement Charles, Mr Jose Cardoso, Mr Bruno Chanel, Mr Frederic Mauch, Mr Laurent Eymard)

PARTICIPATION IN TV AND RADIO PROGRAMS

PUBLIC EXHIBITIONS AND PERFORMANCES

Giovanna Di Marzo Serugendo, Jose Luis Fernandez-Marquez, Francesco De Angelis:

- ICT 2013, Vilnius – Demonstration of the EU SAPERE Project - <http://ec.europa.eu/digital-agenda/en/ict-2013-conference>

HONOURS AND SCIENTIFIC AWARDS

Nadia Magnenat-Thalmann:

- Professor Nadia Magnenat-Thalmann received the CGI Achievement Award Computer Graphics International 2013, Germany - <http://cgi2013.welfenlab.de/>

OTHER ACHIEVEMENTS

Giovanna Di Marzo Serugendo:

- Invited Professor, University Claude Bernard Lyon 1, 2013-2014

Jean-Henry Morin:

- Participation avec les étudiants du cours Design Science de 3ème année du Bachelor en Système d'Information et Science des Services, à un atelier de co-création dans le cadre du concours Open Data des TPG, Lift, Genève, 9 novembre 2013

Katarzyna Wac:

- International short research visit at Stanford University (USA) titled «Studying the Usage of Mobile Applications for Chronic Disease Self-Management in Different Contexts of Daily Life» (SNSF-IZKoZ2_148824)(7-9.2013), <http://p3.snf.ch/Project-148824>
- Quality of Life Living Lab (mQoL) is a Member of European Network of Living Labs (ENoLL) since August 2013, <http://www.qol.unige.ch/mQoL.html>
- The QoL team's mobile application UnCrowdTPG has won a second place in the TPG Open Data Challenge, <http://www.tpg.ch/web/open-data>

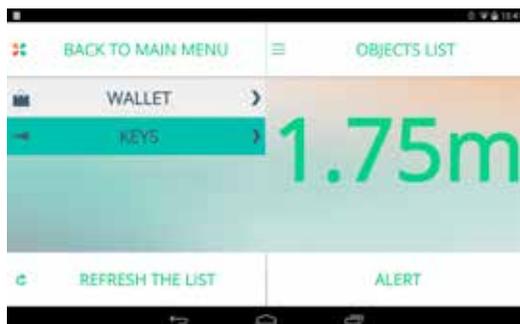

Figure 16: Object localisation - EDLAH project

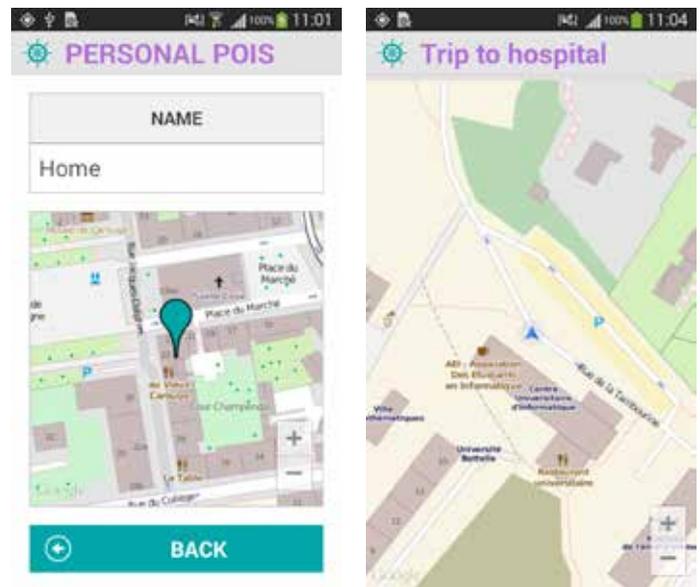

Figure 15: Indoor positioning & Navigation adapted to seniors - Virgilius project

TECHNOLOGY TRANSFER

Jean-Henry Morin:

- Continuation of the academic partnership cooperation with Fasoo.com in South Korea on Exception Management in Enterprise DRM (Provisional Licensing). Deployment of the model within 16 companies, with a total of over 13'000 users.
- Launch of ThinkData in South Korea, November 2013.

FUNDED RESEARCH PROJECTS

Participation to European projects

VIRGILIUS

AAL project

Partners: Telespazio (Italy), Azienda Ospedaliera di Perugia (Italy), University of Geneva (Switzerland), arx iT SA (Switzerland), RARTEL (Romania), National Philatelic Museum (Romania)

Period: June 2012 - May 2014

Website: <http://www.virgilius.eu>

EDLAH

AAL project

Partners: karisgroup (England), rsa (Austria), PYXIMA (Belgium), Université de Genève (Switzerland), EverdreamSoft (Switzerland), Maison de Retraite du Petit-Saconnex (Switzerland)

Period: 2013 - 2015

Website: <http://edlah.eu>

SAPERE

Self-Aware Pervasive Service Ecosystems

EU funded project, FET Proactive, FP7- ICT-2009.8.5

Partners: University of Modena e Reggio Emilia (Italy), University of Bolpigna (Italy), University of Geneva (Switzerland), University of Linz (Austria), University of St-Andrews (UK)

Period: October 2010 – September 2013

Website: <http://www.sapere-project.eu>

ACROSS

Autonomous Control For A Reliable Internet Of Services
EU COST Action, ACROSS-IC1304
Period: November 2013 – November 2017
Web site: http://www.cost.eu/domains_actions/ict/Actions/IC1304

AAPELE

Architectures, Algorithms and Platforms for Enhanced Living Environments
EU COST Action, AAPELE-IC1303
Period: November 2013 - November 2017
Web site: http://www.cost.eu/domains_actions/ict/Actions/IC1303

MyGuardian

A Pervasive Guardian for Elderly with Mild Cognitive Impairments
EU project, AAL-2011-4-27
Partners: HI-Iberia Ingenieria y Proyectos SL (SME) and CIETEX (end-user) (both from Spain), University of Geneva (University) and VigiSense (SME) (both from Switzerland), ConnectedCare (SME) and Careyn (end-user) (both from the Netherlands) and CNRS Ageing, Imaging, Modeling lab (end-user) (France)
Period: May 2012 – April 2015
Web site: <http://www.qol.unige.ch/research/myguardian.html>

WayFis

Way Finding Seniors
EU project, AAL programm
Partners : user organisation : CETIEX and Hársfalevél Pension , Research centers : UniGe and BZF, and SMEs : HI-Iberia (coordinator) and arx iT SA
Period: April 2011 – October 2013
Web site: <http://www.wayfis.eu/>

ULOOP

User-centric Wireless Local Loop
EU FP7 project
Partners: Alcatel Lucent BellLabs (ALBLF), France, University Lusófona/COFAC srl, Portugal, Huawei Technologies Dueseldorf GmbH (HWDU), Germany, Aria S.p.A. (ARIA), Italy, Caixa Mágica Software Lda, Portugal, FON Wireless Ltd, United Kingdom, Technische Universitaet Berlin (TUB), Germany, University of Kent (UniK), United Kingdom, Level7 (LEVEL7), Italy, University of Geneva (UNIGE), Switzerland, University of Urbino (UniUrb), Italy
Period: September 2010 – August 2013
Web site: <http://www.uloop.eu>

TEFIS

TEstbed for Future Internet Services
EU FP7 project
Partners: THALES Services SAS, Engineering Ingegneria Informatica S.p.A., Institut National de Recherche en Informatique et Automatique, IT Innovation, Fundação de Apoio à Univer-

sidade de São Paulo, THALES Communications, ActiveEon, Lulea University of Technology – Centre for Distance-spanning Technology, Software Quality System S.A, Fraunhofer Institute FOKUS, Poznan Supercomputing and Networking Center, University of Geneva, Universitat Politecnica de Catalunya, Technische Universitaet Braunschweig, Institute of Communication and Computer systems, VELTI, Lumiplan, Megève Tourisme
Period: December 2011 - February 2013
Web site: <http://www.tefisproject.eu>

MUSES

Multiplatform Usable EndpointSecurity
EU FP7 project
Partners: S2 Grupo de Innovación en Procesos Organizativos SL, Universidad de Granada, ITEC e.V., University of Hamburg, Université de Genève, CURE Center for Usability Research and Engineering, WIND Telecomunicazioni SpA, TXT e-solutions SpA, Katholieke Universiteit Leuven, Sweden Connectivity AB
Period : October 2012 – September 2015
Web site: <http://www.musesproject.eu>

3D Life

«Bringing the Media Internet to Life»
Partners: 7 partners (Queen Mary and Westfield College, University of London – United Kingdom, Dublin City University – Ireland, Institut Telecom – France, Fraunhofer Gesellschaft zur Foerderung der angewandten Forschung e.V. – Germany, MIRALab, University of Geneva - Switzerland, Centre for Research and Technology Hellas – Greece, Korea University – Republic of Korea)
Period : January 2010 – June 2013
Website : <http://www.3dlife-noe.eu/>

SOCIONICAL

Complex socio-technical system in ambient intelligence
EU FP7 project
Partners: University of Passau (Coordinator), Beacon Tech Ltd., London School of Economics, ETH Zurich, University of Amsterdam, AGH UST, University of Würzburg, Fraunhofer FIT, SICE, SmartCare Srl, TU München, University of Halle-Wittenberg, CPD, University of Geneva
Period: July 2012 - January 2013
Website: <http://socionical.eu/>

EMC2

Support Action Towards Excellence in Media Computing and Communication
EU FP7 project
Partners: Queen Mary and Westfield College, University of London (England), Dublin City University (Ireland), Institut Mines-Telecom (France), Fraunhofer-Gesellschaft Zur Foerderung Der Angewandten Forschung E.V (Germany), Université de Genève, Centre for Research and Technology Hellas (Greece)
Period: June 2011 - June 2014
Web site: <http://www.emc-square.org/>

MULTISCALEHUMAN

Multi-scale Biological Modalities for Physiological Human Articulation
EU Project
Partners: MIRALab, University of Geneva - Switzerland, Les Hôpitaux Universitaires de Genève – Switzerland, Universidade do Minho – Portugal, Medizinische Hochschule Hannover – Germany, Consiglio Nazionale Delle Ricerche - Italy, Softeco Sismat Srl – Italy, Gottfried Wilhelm Leibniz Universität Hannover – Germany
Period: October 2011 - September 2015
Website: <http://multiscalehuman.miralab.ch/>

REPLAY

Reusable low-cost platform for digitizing and preserving traditional participative sports
EU FP7 project
Partners: Fundacion Centro de Tecnologias de Interaccion Visual y Comunicaciones VICOMTECH – Spain, Dublin City University – Ireland, MIRALab, University of Geneva – Switzerland, IN2 Search Interfaces Development Limited – United Kingdom, Gaelic Athletic Association – Ireland, Centre For Research and Technology Hellas – Greece, Eusko Jaurlaritz-Gobierno Vasco – Spain, Vicon Motion Systems Limited – United Kingdom
Period: March 2013 - February 2016
Web site: <http://www.fp7-replay.eu/>

ITN-DCH

Initial Training Network for Digital Cultural Heritage: Projecting our Past to the Future
EU FP7 project
Partners: Cyprus University of Technology - Cyprus, National Technical University of Athens - Greece, Universität Stuttgart – Germany, Foundation for Research and Technology Hellas – Greece, Fraunhofer Gesellschaft zur Förderung der angewandten Forschung e.v. - Germany, Katholieke Universiteit Leuven – Belgium, Fondazione Bruno Kessler – Italy, Centre National de la Recherche Scientifique - France, Universidad de Murcia - Spain, Univerzav Ljubljani - Slovenia, Arc-tron 3d Vermessungstechnik-und Softwareentwicklung

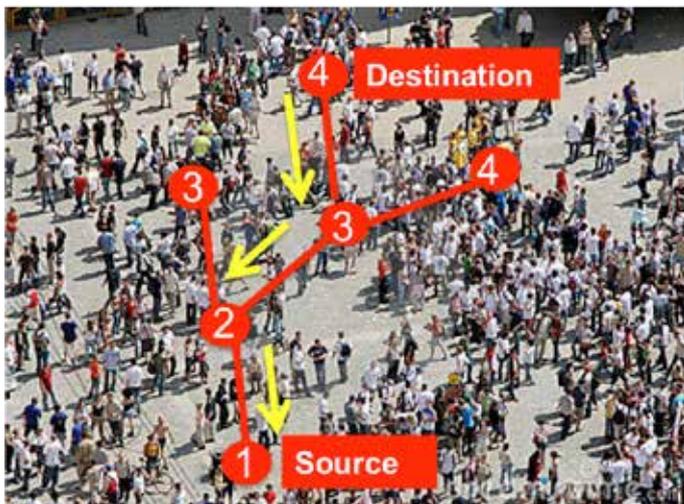

Figure 18: Crowd Steering

Figure 17: Confidential channel over MANET

Gmbh - Germany, 7Reasons Medien Gmbh - Germany, The University of Warwick – United Kingdom
Period: October 2013 - September 2017

ANINEX

User Centred Computer Animation Techniques for Next Generation Digital Creation and Modelling
EU FP7 project
Partners: National Centre for Computer Animation, Bournemouth University – United Kingdom, MIRALab, University of Geneva – Switzerland, National Laboratory for Information Science and Technology, Tsinghua University – China, The State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences – China, The State Key Laboratory of Computer Aided Design and Computer Graphics, Zhejiang University – China
Period: December 2013 - November 2017
Web site: -

Participation to National projects

PLE

Personal Learning Environment
SWITCH funded project
Partners: EPFL, University of Fribourg, University of Geneva
Period: August 2011 - December 2012, extended to April 2013
Website: <http://ple.unige.ch>

CLOVIS

Cloud Computing Improvement through Risk and SLA Management
FNS project 136316
Partners: CRP Henry Tudor, ISS (University of Geneva)
Period: October 2011 – September 2013
Website: <http://p3.snf.ch/project-136316>

eGov.STICS

Service Tangibilization Interactive Compliance System
Fonds privé, CTI project, Etat de Genève
Period: September 2011 – December 2014

An Open Market for Cloud Data Services

SNF project 146603
Period: October 2013 - September 2014
Website: <http://p3.snf.ch/project-146603>

Geosop

CTI project
Partners: EverdreamSoft SA
Period: June 2012 - December 2013
Website: <http://tam.unige.ch/projects/geosop.html>

GAVI

Period: 2012 - 2013
Website: <http://tam.unige.ch/projects/gavi.html>

MoveYourStory

Period: 2013 - 2014
Website: <http://tam.unige.ch/projects/moveyourstory.html>

PCS-OBEY

Enabling People-Centric Sensing by Overcoming the privacy Barrier
SNF project 149591
Period: 2013 - 2015
Website: <http://p3.snf.ch/project-149591>

Aerial Crowd

«Swiss National Research Foundation Project: Aerial Crowd: Populating Mixed Reality Cities»
Partners: 4 partners (Ecole Polytechnique Fédérale de Lausanne, Computer Vision Laboratory (CVLab) – Switzerland, Ecole Polytechnique Fédérale de Lausanne, Virtual Reality

Laboratory (VRLab) – Switzerland, ETHZ Computer Vision Laboratory – Switzerland, MIRALab, University of Geneva – Switzerland)
Period: February 2011 - January 2013

Identité académique numérique

SWITCH Project
Partners: Université de Fribourg, SWITCH
Period: August 2012 - March 2013
Website: <http://www.switch.ch/fr/aaa/projects/detail/UNIGE.11>

Learning infrastructure

CRUS Project
Partners: SWITCH and Swiss Universities
Period: January 2012 - December 2013

TEACHING

Giovanna Di Marzo Serugendo:

- **Self-organising Mechanisms and Design Patterns for Engineering Self-Organising Applications** – A Smart Environment Application (MSC – University Lyon)
- **Introduction à la pensée informatique**, ISS, Bachelor course, 3 ECTS, 42 hours, 30 students
- **Assessment of Information Systems**, ISS, Master course, 3 ECTS, 42 hours, 55 students
- **Bases de données**, ISS, Bachelor course, 6 ECTS, 21 hours, 25 students
- **Services foundation**, ISS, Master course, 3 ECTS, 42 hours, 4 students
- **Contextualisation et Qualité des Services**, ISS, Bachelor course, 6 ECTS, 84 hours, 20 students

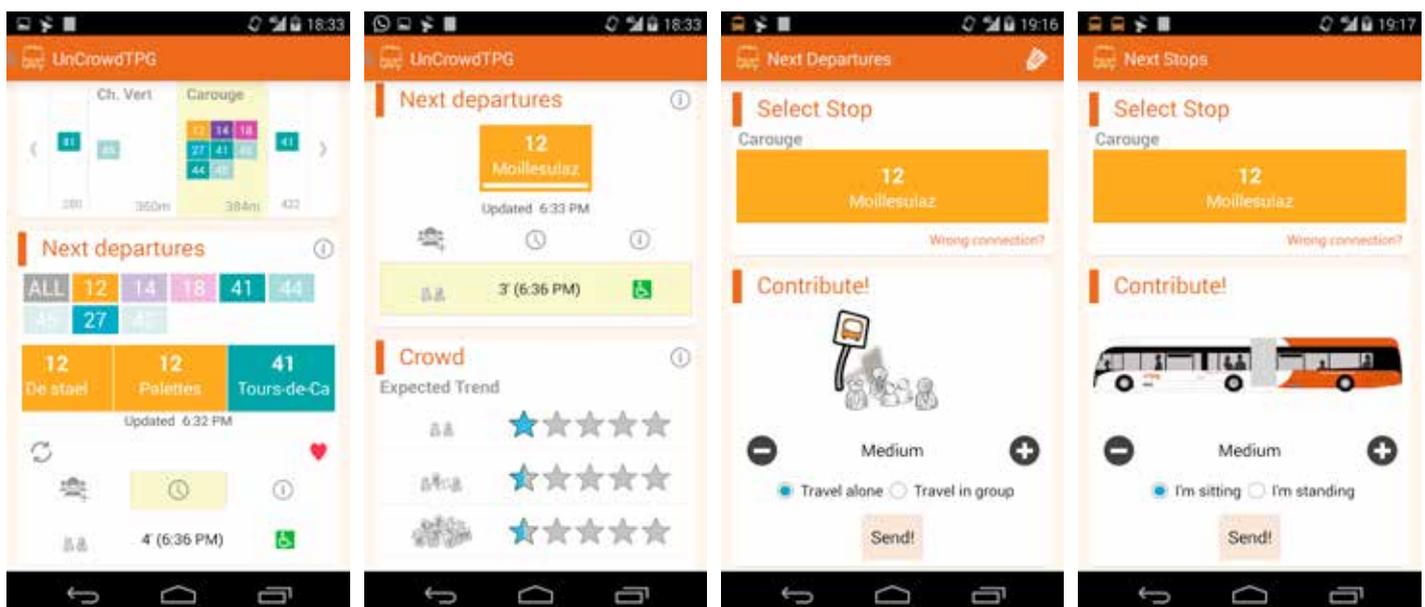

Figure 19: UnCrowdTPG is a TPG open data API contest winner. It is a smartphone application that let people know which are the less crowded trams and buses for a more comfortable commute. It is based on the collaboration between people to engage them and be part of the general society and family of TPG raiders

- **Social and Legal Issues in Informatics**, ISS, Master course, 3 ECTS, 84 hours, 55 students
- **Design Science Research**, ISS, Master course, 3 ECTS, 42 hours, 20 students

Giovanna Di Marzo Serugendo and Jose Luis Fernandez-Marquez:

- Sep 2013 - **From Self-Organizing Mechanisms to Design Patterns to Engineering Self-Organizing Applications**, IEEE International Conference on Self-Adaptive and Self-Organising Systems (SASO'13), Philadelphia, USA

Abdelaziz Khadraoui:

- **Service Institutional Strategies**, ISS, Master course, 6 ECTS, 56 hours, 8 students
- **Rétro-ingénierie des services et des systèmes d'information**, Certificat de Formation Continue MATIS, October 2013, November 2013, 10 ECTS, 8 students

Dimitri Konstantas:

- **Réseaux de communication**, ISS, Bachelor, 48 hours, 12 students
- **Mobile Systems and Services**, ISS, Master, 48 hours, 10 students
- **Design of Multimedia Services**, ISS, Master, 48 hours, 12 students
- **Technologies for Services**, ISS, Master, 48 hours, 11 students
- **Veille technologique, InfoSec (program director)**, ISS, Continuous education, 24 hours, 30 students
- **Systèmes d'information et sciences des services**, ISS, Master 2 Gestion d'entreprise / Continuous education, 24 hours, 20 students

Michel Léonard:

- **Models and Design**, ISS, Master course, 56 hours, 7 students
- **Introduction to Service Science**, ISS, Bachelor course, 6 ECTS, 56 hours, 300 students
- **Méthode et Réalisation de service**, ISS, Bachelor course, 6 ECTS, 56 hours, 8 students
- **Principes et modélisation des services**, ISS, Bachelor course, 6 ECTS, 56 hours, 25 students
- **Bases de données**, ISS, Bachelor course, 6 ECTS, 56 hours, 25 students
- **Business Development with Services**, ISS, Master course, 6 ECTS, 56 hours, 8 students

Laurent Moccozet:

- **Service Innovation Lab**, ISS, Master, 3 ECTS, 28 hours, 8 students
- **Introduction à la programmation**, ISS, Bachelor, 6 ECTS, 56 hours, 20 students

- **Services et technologies multimédia**, ISS, Bachelor, 6 ECTS, 56 hours, 60 students
- **Introduction à la science des services**, ISS, Bachelor, 6 ECTS, 56 hours, 300 students

Jean-Henry Morin:

- **Systèmes d'Information et Applications**, ISS, Bachelor course, 3 ECTS, 28 hours, 153 students
- **Introduction à la Sécurité, Ethique et Règlementation des Services**, ISS, Bachelor course, 3 ECTS, 28 hours, 6 students
- **Design Science**, ISS, Bachelor course, 6 ECTS, 56 hours, 7 students
- **Systèmes d'Information d'Entreprise**, ISS, Bachelor course, 6 ECTS, 56 hours, 7 students
- **Informatique et Systèmes d'Information I, Public Management**, ISS, Master course, 3 ECTS, 28 hours, 21 students
- **Selected Topics, Advanced Seminar on Industrial & Emerging issues**, ISS, Master course, 3 ECTS, 28 hours, 7 students
- **Service Innovation Lab**, ISS (shared with Laurent Moccozet), 3 ECTS, 28 hours, 7 students
- **DRM Technologies**, ISS, Formation continue InfoSec, 2 hours, 30 students
- **Evolution et Perspectives en Technologies de l'Information et de la Communication**, Bachelor en lettres et sciences humaines, pilier sciences de l'information et de la communication, chargé d'enseignement à la Faculté lettres et sciences humaines, Université de Neuchâtel, 5 ECTS, 28 hours, 73 students
- **Design Science & Design Thinking**, CUSO Doctoral Program in Computer Science, in cooperation with Prof. Yves Pigneur, University of Lausanne, 5 days program, 35 hours, 12 students

Knowledge Engineering

DOMAIN ACTIVITIES

The Knowledge Engineering research group studies the representation, processing, and visualization of formalized and non-formalized knowledge resources. It's current research activities concentrate on the following topics:

- Defining models, operations, and algorithms for the management of heterogeneous knowledge resources (ontologies, terminologies, thesauri, text corpora, ...) in large knowledge repositories.
- Semantically enriching semi-formal knowledge organization systems to produce formal ontologies
- Extracting and representing scientific knowledge elements contained in scientific texts, and building systems for precise scientific information retrieval
- Studying 3D visualization techniques to represent data and knowledge associated to objects of 3D virtual environments.
- Develop models to formalize linguistic knowledge resources and to process them with high performance computing infrastructures.

The main application areas are: semantic digital libraries; manuscript indexing, retrieval, and interconnection; urban and geographic knowledge engineering; the extraction linguistic knowledge from large open resources (Wikipedia)

Visualization of enrichment information in enriched 3D city models

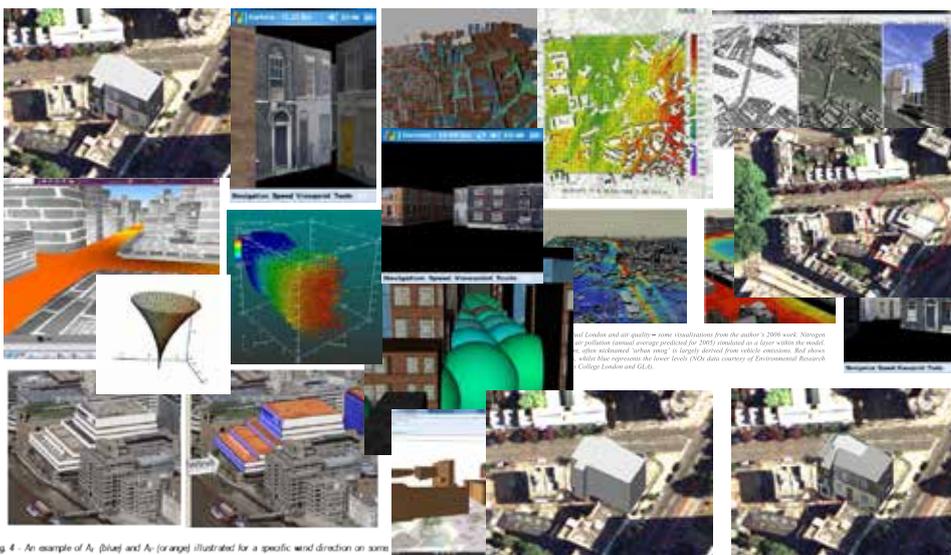

Fig. 4. An example of A_1 (blue) and A_2 (orange) illustrated for a specific wind direction on some London buildings, showing how an urban area can be much more complex to work with in reality.

LATL

Laboratory for the Analysis and Technology of Language

Battelle building A drone view

Laboratory for the Analysis and Technology of Language

DOMAIN ACTIVITIES

LATL (<http://www.latl.unige.ch>) has been active in the field of natural language processing since the early 1990's. Its main research focus is the development of a multilingual syntactic parsing model (the Fips parser), as well as the development of large lexicons and dictionaries.

The Fips parser is currently available for several of the main European languages (English, French, German, Italian and Spanish), with several other languages at various stages of development. It is based on a grammatical model inspired by Chomsky's generative grammar and on an object-oriented design for its implementation. The parser and its rich lexical database (Figure 1) are used in a number of applications, including machine translation (Figure 4), terminology extraction, speech-to-speech translation, and computer-assisted language learning.

LATL has also speech technology activities ranging from speech corpus collection to acoustic analysis, through three on-going research projects:

- on speaking style characterisation and modelling
- on Swiss German dialect recognition through a smartphone application : Voice App project in partnership with University of Zurich (Figure 2)
- on speech-to-speech translation in the Siwis project in partnership with IDIAP, ETH and University of Edinburgh (Figure 3)

TECHNOLOGY TRANSFER

LATL.ch is a technology start-up specialized in the development of linguistic software components. Closely associated with LATL laboratory, LATL.ch develops and commercializes products based on fundamental research conducted in the university lab. Two companies use its POS-Tagger: Acapela Group, a European Speech synthesis company, and ShareWizMe, a French innovative company specialized in real time analysis of contributions (ideas, feedback, comments).

Software Modeling and Verification

Software Modeling and Verification

DOMAIN ACTIVITIES

Symbolic Model Checking was developed with the idea of verifying high level models with a reasonable amount of work for the user. In particular we propose to separate the model to the informations for performing efficiently model checking (clustering, anonymization, partial unfolding). The introduction of new kind of decision diagrams (Σ -DD) based on a generalization of the Shannon decomposition principles allow us to perform efficiently model checking for models with huge combinatorial explosion of states (around 4^{500} symbolic states). We are currently exploring the systematic use of rewriting of set of terms principles based on decision diagrams and operational control based on strategies as a metalevel in model checkers. A tool, called ALPINA, was implemented. We also launch a model checking contest in the conference Petri Nets in order to be able to compare existing model checkers on significant benchmarks. Our tool performed relatively well, but most remarkably perform on most of the models which is not the case for all the other tools in competition. We unify modular Petri Nets using an extension of the CO-OPN synchronization composition operators. This model gathers all modular extensions of Petri nets in an elegant way. The interest of this approach is also to contribute to the standardization efforts made in the context of the ISO organization for standardizing Petri Nets.

Scientific and Parallel Computing

DOMAIN ACTIVITIES

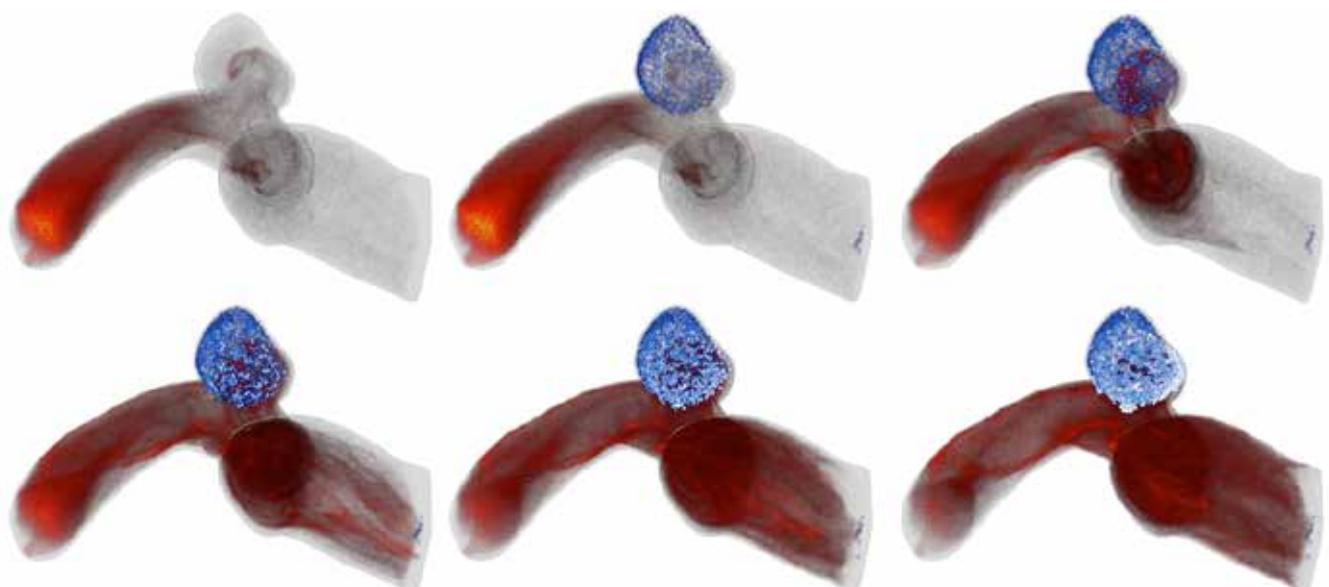

A main research activity concerns the study of complex systems, in particular the development of new numerical methods to model and simulate phenomena in natural sciences, economics, social systems and bio-medical applications. Cellular automata, Lattice Boltzmann and multi-agent techniques are central tools to address these questions. Parallel programs and algorithms are developed to implement the simulation on large PC clusters, supercomputers or GPUs to discover, explain or reproduce new phenomena. In particular we keep developing and improving the PALABOS software, a powerful open-source Lattice Boltzmann solver.

Recent activities have focused on developing a new methodology and a new software infrastructure to solve challenging multiscale applications, in particular in biomedical problems thrombosis in cerebral aneurysms (THROMBUS European project). In the European MAPPER project, we developed MML, a multiscale modeling language that allows the implementation of distributed multiscale applications on the European computing infrastructure, as well as the coupling of parallel clusters with HPC cloud systems. As a demonstrator, we develop a multiscale simulation of the Rhône river, in collaboration with SIG (See figure below). Within the European MARINET project, we provide a numerical simulation of a wave energy converter.

Another domain of activity is bioinformatics, in collaboration with Swiss Institute of Bioinformatics. New classification methods and algorithm techniques are developed to analyse various biological problems.

In the European project SOPHOCLES, recently started, we develop a theory of complex systems based on the way information propagates in various dynamical systems and complex networks. The theory is then applied to high frequency financial data and social interactions.

The figure below illustrates the time evolution of the formation of a thrombus in a cerebral aneurysm (THROMBUS project, simulation by O. Malaspinas).

Theoretical Computer Science

DOMAIN ACTIVITIES

Experimental driven research on Topology Control Protocols for Wireless Sensor Networks (WSN) using transmission power and throughput rate feedback schemes. The goals include link qualification in terms of symmetry and coherence and link quantification. Transmission power constitutes the link «generator» and throughput rate the link «regulator» to meet the qualitative and quantitative criteria for links between WSN nodes .

Research on designing a geographic routing algorithm for large scale networks, which is an extension to the Virtual Raw Anchor Coordinate localization based geographic routing. The goal is to perform routing in wireless ad-hoc network in a hierarchical manner, where in the top level routing is done between two geographic regions and in the bottom level performing routing to the exact node. A randomized protocol is designed and evaluated with simulations.

Design of a distributed publish/subscribe algorithm for an ubiquitous sensing scenario. We consider unstructured and free-geocoordinates sensing networks in which no network protocol is provided. Our solution, which avoids implying all the nodes of the network in the dissemination process, uses a distributed notification service defined by Directional Random Walks (DRW). A DRW is a probabilistic technique able to go forward into the network following a loop-free path. The principle assumed in our research is that two lines in a plane cross.

Also research on Future Networks, Internet of Things and Crowdsensing. Our efforts focus on problem modeling aspects and incentive formulation regarding the crowd participation in tasks that aim at optimizing spatial and temporal coverage issues.

Also, research on radiation aware wireless networking; studying the cumulative impact on ERM caused by multiple wireless sources in terms of numbers, topology, protocol, etc.

INTERNATIONAL AND NATIONAL ADVISORY COMMITTEES

- ERCIM- European Research Consortium for Informatics and Mathematics.- José Rolim- member of the Board of Directors
- IFIP - The Swiss IFIP Committee (SIC) - TC1 Foundations of Computer Science – delegate: Jose Rolim

PHD THESIS COMMITTEES

- Georgios Georgiadis, Ph.D. thesis on January 31, 2013 at Chalmers University, Sweden – José Rolim member of the jury

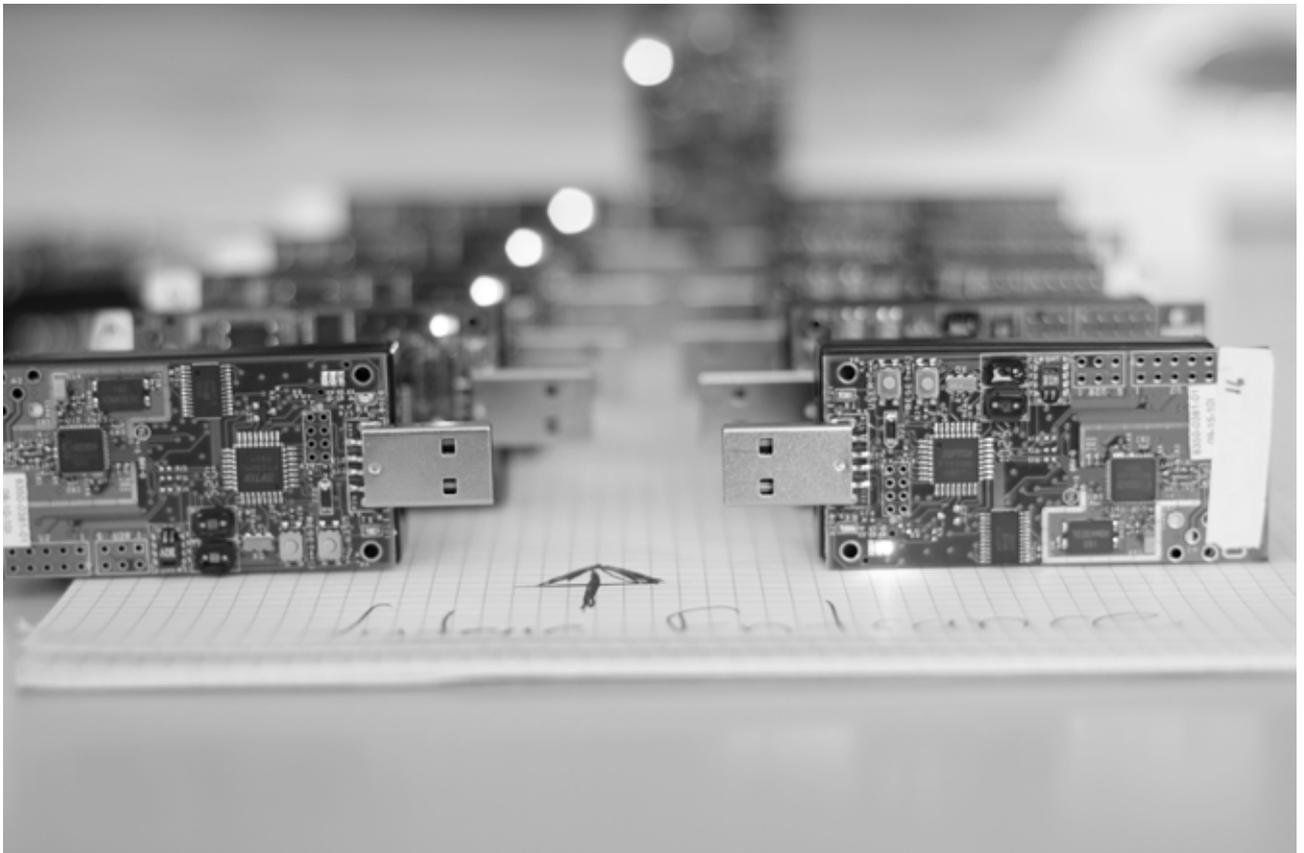

CONFERENCE ORGANIZATION AS CHAIR OR CO-CHAIR

- DCOSS 2013 IEEE International Conference on Distributed Computing in Sensor Systems, Cambridge, Boston, US chair steering committee: Jose Rolim
- APPROX 2013 – 16th International Workshop on Approximation Algorithms for Combinatorial Optimization Problems – Berkeley- August 2013 - chair steering committee: Jose Rolim
- RANDOM 2013 - 17th International Workshop on Randomization and Computation –Berkeley – August 2013 - chair steering committee: Jose Rolim
- SEA 2013– 12th International Symposium on Experimental Algorithms –May –Rome, Italy- chair steering committee: Jose Rolim
- ALGOSENSORS 2013 - 9th International Workshop on Algorithms for Sensor Systems, Wireless Ad Hoc Networks and Autonomous Mobile Entities –Sophia Antipolis, France - member steering committee: Jose Rolim
- IPDPS 2013 - 27th IEEE International Parallel & Distributed Processing Symposium. May 2013, Cambridge, US member steering committee: Jose Rolim

MEMBER OF CONFERENCE PROGRAM COMMITTEES

- ADHOC-NOW 2013: International Conference on Ad Hoc Networks and Wireless (ADHOC-NOW) Worclaw Poland, Jose Rolim
- CIAC 2013: International Conference on Algorithms and Complexity, Barcelona, May 2013 – Jose Rolim
- ICALP 2013: 40th International Colloquium on Automata, Languages and Programming, July 2013 – Latvia, Riga. Jose Rolim
- MOBIWAC 2013: The 11th ACM* International Symposium on Mobility Management and Wireless Access, Barcelona, Spain, Pierre Leone
- UBICOMM 2013: The Seventh International Conference on Mobile Ubiquitous Computing, Systems, Services and Technologies Porto,Portugal, Pierre Leone
- ALGOSENSOR 2014: 9th International Symposium on Algorithms and Experiments for Sensor Systems, Wireless Networks and Distributed Robotics, Sophia Antipolis, France, Pierre Leone
- AsCOMS 2013: 2nd Workshop on Architecting Safety in Collaborative Mobile Systems, Toulouse, France Pierre Leone
- TPMC 2013: International Conference on Theory and Practice in Modern Computing, Prague, Czech Republic, Pierre Leone
- SEA 2013: 12th International Symposium on Experimental Algorithms, Rome, Italy, Pierre Leone
- sensornets 2013: 2nd International Conference on sensor networks, Barcelona, Spain, Pierre Leone

FUNDED RESEARCH PROJECTS

Participation to European projects

IoT Lab

Researching crowdsourcing to extend IoT testbed infrastructure for multidisciplinary experiments, with more end-user interactions, flexibility, scalability, cost efficiency and societal added value

Partners: Mandat International MI Switzerland, Dunavnet DNET Serbia, Computer Technology Institute and Press «Diophantus» CTI Greece, Geneva University UniGE Switzerland, Alexandra Institute Alexandra Danemark, Luleå University of Technology – Centre for Distant Spanning Technology (CDT) LTU Sweden, University of Southampton Soton UK, University of Surrey

Period: October 2013 – September 2016

Website: <http://www.iotlab.eu/>

HOBNET

Holistic Platform Design for Smart Buildings of the Future InterNET

UE7 – 257466

Period: June 2010 – May 2013

Website: www.hobnet-project.eu

Participation to National projects

Dynamic and Evolutionary Networks ; Modeling, Complexity and Algorithms

FNSR

Principal Investigator: José Rolim

Global Virtual Raw Anchor Coordinates Routing in Sensor Networks

FNSR

Principal Investigator: Pierre Leone

WSNLab Project. Nanotera - Wireless Sensor Network Laboratory

Financed by the Nano-tera CH (NTCH) program.

Partners: University of Bern (Prof. Torsten Braun)

Period: January 2013 - April 2013.

Website: <http://www.nano-tera.ch/projects/332.php#>

POPWIN

Parallel Object Remote Programming for Heterogeneous Wireless Networks over IPv6

Hasler Stiftung

Pierre Leone

OTHERS

Refereeing

- Journal of Green Computing
- Computer Networks (COMNET)
- Simulation Modeling Practice and Theory (SIMPAT)
- Transactions on Computers (TC)
- HortTechnology (HORTTECH)

Editorial responsibilities

- Member of the Editorial Board of the Journal Ad Hoc & Sensor Wireless Networks, Pierre Leone
- Member of the Editorial Board of the journal Algorithm letters, Pierre Leone
- Member of the Editorial Board of the journal ISRN Sensor Networks, Pierre Leone
- Member of the Editorial Board of the journal Algorithms, Pierre Leone

Invited talks

- KNX-city Workshop, «IoT crowdsourcing technologies for energy efficient buildings», Athens, Greece, December 6th, 2013

Technology transfer

- Wisebed testbed. To keep Konstantinos Chantzis' project alive where he had setup a WSN testbed using Wisebed framework. He has transferred his knowledge about that framework and there is a testbed being installed using new version of Wisebed.

TEACHING

- **Network Optimisation**, Computer Science, Master (Option), 4 ECTS, 56 hours, 20 students
- **Compilateurs et Interprètes**, Computer Science, Bachelor, 4 ECTS, 56 hours, 20 students
- **Calculabilité complexité**, Computer Science, Bachelor, 4 ECTS, 56 hours, 24 students
- **Langages Formels**, Computer Science, Bachelor, 4 ECTS, 56 hours, 20 students
- **Algorithmique avancée**, Computer Science, Bachelor, 56 hours, 15 students
- **Programmation de Systèmes**, Computer Science, Bachelor, 56 hours, 15 students
- **Systèmes Informatiques**, Computer Science, Bachelor, 56 hours, 15 students
- **Réseaux Complexes**, Computer Science, Master (Option), 56 hours
- **Systèmes concurrents et distribués**, Computer Science, Bachelor (Option), 56 hours
- **Cryptographie et sécurité**, Computer Science, Bachelor, 56 hours, 15 students
- **Réseaux Informatiques**, Computer Science, Bachelor, 56 hours, 10 students

Administrative Staff

Lara Broi

Marie-France Culebras

Anne-Isabelle Giuntini

Maëlle Rümbeili

The administrative staff of CUI is dedicated to serving at its best the community of researchers, teachers and students. Essentially covering four domains :

Administration: Its role is to manage the CUI budget, logistics, communication, etc. It also manages the Web site, the production of documents (activity report, flyers, etc.) as well as the organization and coordination of public and promotional events such as the book and student fair (Salon du Livre et de l'Etudiant)

- **Elie Zagury** is direction assistant;

Secretariat: Works at the departments level of CUI. Hiring and contract renewals of doctoral students as well as all the tasks related to CUI operations are handled by the secretariat. It also provides a perfect connection to major University services such as HR, accounting, etc.

- **Lara Broi** is secretary.
- **Marie-France Culebras** is secretary;
- **Anne-Isabelle Giuntini** is part-time secretary (50%);
- **Maëlle Rümbeili** is part-time secretary (50%);

IT: Two systems-engineers manage the basic computer infrastructure of CUI (data storage, backups, servers, network, etc.) using Linux, Mac and Windows. Their help and support is appreciated daily by the whole CUI community.

This service works closely with the University IT Division.

- **Nicolas Mayencourt** is system-engineer;
- **Daniel Agulleiro** is system-engineer;

Raoul Sahli

Nicolas Mayencourt, Elie Zagury, Daniel Agulleiro

Library: The CUI Library provides services and tasks as any specialized library of an university center. It is part of the library network of the University of Geneva (<http://www.unige.ch/biblio/sciences/infos/cui.html>) and is proud to offer some specificities in its field. Its current collection contains approximately 10'000 books and 25 specialized print journals.

- **Amélia Bossard** is head librarian;
- **Marie Bertinat** is assistant-librarian (-> April 2013);
- **Jérôme Napoléon** is librarian (start: May 2013).

Reception: Visitors are welcomed by the CUI. Reception will guide them to their destination in CUI building or any place in the University.

- **Raoul Sahli** is receptionist.

Amélia Bossard, Marie Bertinat, Jérôme Napoléon

Financial Report

CUI	
Staff	CHF 930'636.-
• Academic	CHF 283'474.-
• Administrative and Technical	CHF 484'521.-
• Employer's social contributions	CHF 162'641.-
Operating costs - Investment	CHF 65'300.-
Operating costs - Others	CHF 191'000.-
Library	CHF 0.-
CUI SUBTOTAL	CHF 1'186'936.-

FACULTY OF SCIENCES (COMPUTER SCIENCE DEPARTMENT)	
Staff	CHF 3'183'507.-
