Foreword

2009 was the year of the 450th anniversary celebration of the University of Geneva and the Centre Universitaire d'Informatique (CUI) participated actively on it. By opening the doors to the population, the CUI showed its main research areas to hundreds of young students. The CUI welcomed the opportunity to show to an interested young audience how to manipulate sensors and robots, how to participate in a virtual reality context or how to program interfaces to computers among many other activities.

The CUI, one of the oldest computer research institutions in the world, is proud to report its activities during 2009. As a research center, the CUI is a multidisciplinary center dealing with different aspects of computing with members coming from different faculties of the University of Geneva. In particular, the Faculties of Sciences, Economics and Letters provide the CUI with most of its members. This multidisciplinary aspect is also present in this report by means of significant applications, important publications and several projects in such areas.

The year of 2009 has seen the CUI being honored by many awards and new projects to the different research groups and members.

Awards such as distinguished doctor honoris causa, best papers in international recognized conferences and projects in several multidisciplinary areas are present in this report. The CUI is proud of the recognition given by such awards and projects detailed in this report.

As director of the CUI it is my pleasure to invite the reader to discover the main scientific and educational activities of our several laboratories and research groups during the past year.

Welcome to the CUI

Prof. José Rolim
Director of the CUI
University of Geneva

DOMAIN ACTIVITIES

During 2009 the AS Group continued its research in three areas of mobile systems: Quality of Service, Trust and Identity Management, and novel paradigms for mobile information management.

From the point of view of research projects, one project came to successful completion (Geo-Tags), and a new project was accepted (TRAINUTRI) in the domain of Ambient Assisted Living, and is scheduled to start early 2010.

From the point of view of personnel at the end of 2009 the group was composed of 7 persons, headed by Prof. Dimitri Konstantas. In June 2009 Mme Katarzyna Wac defended her PhD thesis and gained a one year Post-Doc scholarship from FNRS, for CMU at the United States.

Fig 1: Hovering information:
An overlay for mobile content

- Hovering information
- Mobile device / user

Hovering information (blue) will be capable of moving from one location to another (from p_{a0} to p_{a4}) jumping across the intermediate physical devices (pink)

Hovering information (blue) will be linked to a location and optionally time stamped (p_{a0}, t_a). Physically, this information will reside in neighbouring devices (pink) (MANET, Sensor net)

In the absence of fixed infrastructure, hovering information will use all devices in its neighbourhood such as phones, RFIDS, sensors, PDAs, laptops, PCs, etc

PHD THESIS

- Katarzyna Wac, «Collaborative Sharing of Quality of Service-Information for Mobile Users», June 2009

INTERNATIONAL AND NATIONAL ADVISORY COMMITTEES

- Dimitri Konstantas: Member of the advisory and scientific committee of the IICREST institute, Sofia, Bulgaria.
- Dimitri Konstantas: Vice-Chair of the ERCIM eMobility WG

CONFERENCE ORGANIZATION AS CHAIR OR CO-CHAIR

Dimitri Konstantas:

- Co-Chair of the The Second International Workshop on e-Health Services and Technologies (EHST 2009), Sofia, Bulgaria, July 29, 2009

Jean-Marc Seigneur:

- Organisation and chair of the trust/reputation track at the ACM SAC 2009.

Jean-Henry Morin:

- Workshops Chair for the 2009 International Conference on Multimedia Information NETworking and Security (MINES2009), Wuhan, Hubei, China, Nov 18-20, 2009.
- Co-chair of the Enterprise Digital Rights and Policy Management and Compliance Track in the 8th Annual Security Conference, Las Vegas, NV, USA, April 15-16, 2009
- Chair of the Enterprise & Media DRM track in the International Conference on Internet Monitoring and Protection, ICIMP 2009, May 24-28, 2009 - Venice/Mestre, Italy
- Co-chair of the 6th IEEE International Workshop on Digital Rights Management, Satellite Workshop of 7th IEEE Consumer Communications & Networking Conference (IEEE CCNC 2010), 13th January, 2010, Las Vegas, Nevada

MEMBER OF CONFERENCE PROGRAM COMMITTEES

Dimitri Konstantas:

- WebScience 2009
- WSKS 2009
- I3E 2009
- ICSoft 2009
- I-WEST 2009

Jean-Marc Seigneur:

- ACM SAC
- IFIP Trust Management International Conference
- International Journal of Networking and Virtual Organization
- Wiley Computational Intelligence International Journal
- Context-Awareness Trust and Web 2.0 Trust Workshop
- World Congress on Privacy, Security, Trust and the Management of e-Business
- Formal Aspects of Security and Trust Workshop
- International Conference on Information Technology
- International Conference on Reputation: Theory and Technology
- International Conference on Network and System Security

Jean-Henry Morin:

- 5th IEEE International Workshop on Digital Rights Management Impact on Consumer Communications, within the 6th Annual IEEE Consumer Communications & Networking Conference, IEEE CCNC 2009, January 13, 2009, Las Vegas, Nevada.
- International Conference on Knowledge Management and Information Sharing, (KMIS 2009), Madeira, Oct 5-8 2009, Portugal
- Second International Workshop on Next Generation Security (WNGS '09), June 25-27, 2009, Korea University, Seoul, Korea. Co-located with 3rd International Conference on Information Security and Assurance (ISA 2009)
- First International Workshop on Global Information Security for an Inclusive Information Society (GloSec 2009), within the Fourth International Conference on Availability, Reliability and Security ARES 2009, March 16-19, 2009, Fukuoka, Japan
- International Symposium on Collaborative Technologies and Systems (CTS 2009), May 18-22, 2009, Baltimore, Maryland, USA
- IEEE International Conference on Collaborative Computing: Networking, Applications and Worksharing. CollaborateCom 2009, Nov. 11-14, 2009, Crystal City, Washington D.C., USA.

INVITED TALKS

- Jean-Henry Morin: Speaker at Lift Asia 09, DRM From Dystopia to (Serious) Fun ?, Jeju, South Korea, Sept 17-18, 2009. Talk to be featured in TED Talks on TED.com
- Jean-Henry Morin: Panelist on the Future of DRM panel, US Federal Trade Commission (FTC) and the Technology Law and Public Policy Clinic at the University of Washington School of Law, Digital Rights Management Town Hall, Seattle, Washington, March 25, 2009.

FUNDED RESEARCH PROJECTS

Participation to European projects

PlayMancer

A European Serious Gaming 3D Environment

Funded by the FP7 programme of the EU

Partners: Systema Technologies S.A. (Coordinator, Greece), TXT e-solutions S.p.A. (Italy), Netunion s.a.r.l. (Switzerland), University of Patras - The Wire Communications Laboratory (Greece), Technische Universitaet Wien (Austria), Fundacio privada institut d'investigacio biomedica de bellvitge (Spain)

Period: November 2007 - October 2010

Website: <http://www.playmancer.eu/>

—

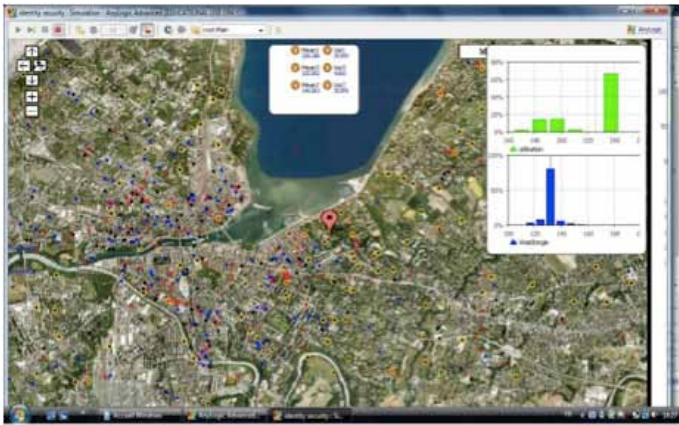

Fig 3: FoxyTag Virtual Tags in the Geneva Area

PERIMETER

User Centric Paradigm for Seamless Mobility in Future Internet

Funded by the FP7 programme of the EU

Partners: Grupo Corporativo GFI Informatica (GFI), Traffix Systems Ltd (TxS), Université de Genève (UNIGE), Fachhochschule Vorarlberg GmbH (FHV), Waterford Institute of Technology (WIT), Blekinge Institute of Technology (BTH), Technische Universität Berlin (TUB), Turkcell Iletisim Hizmetleri A.S (TC), Consorzio Nazionale Interuniversitario per le Telecomunicazioni (CNIT), Telefonica I+D (TID)

Period: May 2008 - April 2011

WebSite : <http://www.ict-perimeter.eu>

Traffic Monitoring and Analysis

Theory, techniques, tools and applications for the future networks

Funded by : COST Action: IC0703

Partners : Coordinator Forschungszentrum Telekommunikation Wien, Austria

Period: April 2008 - March 2012

Web Site: <http://www.cost-tma.eu/>

Participation to National projects

Geo-Tags

Trusted geo-spatial tags,

Funded by CTI, Bern

Partners: ArxIT SA, Societe Nautique de Geneve / Porto Central

Period: May 2007 - April 2009

Monitoring and analysis of wireless networks for a QoS-Prediction Service design and development

Funded by SER (Swiss federal secretariat for research and education)

Period: November 2008 - October 2011

TECHNOLOGY TRANSFER

Jean-Henry Morin: Signature in September 2009 of an MOU with **Fasoo.com**. The scope of the cooperation is to facilitate Exception Management Model-based digital rights management ("DRM") solution by integrating Fasoo Enterprise DRM Suite. The cooperation includes exchange of know-how and technology.

OTHERS

Dimitri Konstantas:

- Expert Evaluator for the Commission of the European Union
- Expert evaluator for the Dutch National Research Foundation
- Expert evaluator for the Canadian National Research Foundation
- Member of the «scientific committee» of IICREST (Sofia, Bulgaria)
- Member of the «commission de diplômes» HESGE

Jean-Marc Seigneur:

- International expert reviewer for the review of EU-funded projects

Jean-Henry Morin:

- Editorial Board Member of the Journal of Service Science (JSS), the Society of Service Science (SoSS) - <http://www.soss.or.kr/>
- Editorial Board Member of the International Journal On Advances in Systems and Measurements, IARIA http://www.ariajournals.org/systems_and_measurements/
- Managing Editor of the Annals of Security (ASec) <http://annals-security.org>
- Co-organizer of Think Services - Think Tank on Service Science and Innovation, an initiative of the department of Information Systems, University of Geneva and the Observatoire Technologique, State of Geneva
- Co-animator of a public forum for questions on Internet & Society for the Swiss television (TSR) : Question sur : <http://questions.tsrdecouverte.ch/internet-societe>

TEACHING

cvml.unige.ch

Computer Vision and Multimedia Laboratory

Prof. Thierry Pun

cvml.unige.ch

DOMAIN ACTIVITIES

The **Computer Vision and Multimedia Laboratory** (CVML, <http://cvml.unige.ch>), divided into three groups, carries out research in multimedia data processing, multimedia data management and security, as well as in multimodal human-machine interaction. Research applies to media such as text, audio tracks, sounds, images and videos, and to physiological signals.

Content-based Visual Indexing and Retrieval group (Viper, MER. S. Marchand-Maillet, <http://viper.unige.ch>): develops strategies for the efficient indexing retrieval and exploration of large multimedia databases. The group studies the complete chain of multimedia management from multimedia processing to content modeling, description and storage and interactive retrieval.

Stochastic Information Processing group (SIP, Prof. S. Voloshynovskiy, <http://sip.unige.ch>): studies various aspects of information theory and statistical (stochastic) information analysis and processing. The applications mostly cover object identification and authentication based on unclonable object features in large nonstructured databases originating from various imaging techniques, mass-spectrometry and bioinformatics. Current research also concerns privacy preserving search, indexing and multiclass classification.

Multimodal Interaction group (MMI, Prof. Th. Pun, <http://cvml.unige.ch/MMI>): studies various forms of interaction between humans, computers, and environment. Some considered interaction modalities are haptic, auditory, and based on physiological signals such as EEGs (electroencephalograms), EMG (electromyograms), blood pressure, galvanic skin resistance (GSR) and skin temperature, breathing rate. Current developments concern: affective state determination and emotion recognition and their use for affective computing, multimodal interaction, brain-computer interfaces, and mobility aids for sight handicapped people.

The CVML has various specialized equipment and associated software:

- portable microscope with wireless communications for item identification and authentication;
- servers with high storage (overall 3.5Tb, Raid 5) and processing capabilities (1 Transtec Calleo (2 Xeon Dual Core, 12Gb RAM) and 2 SunFire X4150 (2 QuadCore, 32Gb RAM each), all 64bits architecture).
- Biosemi Active II EEG acquisition system (<http://www.biosemi.com/>) with 64+16 electrodes, with other sensors to record heart rate, GSR, skin temperature, breathing rate, blood pressure, and EMGs;
- Guger Technology gTec gMobilab+ mobile physiological signals recording system (<http://www.gtec.at/>);
- Eckel C14 audiometric research chamber (<http://www.eckel.ca/>) with electromagnetic insulation (Faraday cage), 2.16m x 1.80m x 2.37m;
- eye gaze-tracker QuickGlance 2 (EyeTech Digital Systems);
- head-mounted display Emagin z800;
- stereo cameras: Videre Design STH-MDCS2, Bumblebee CCD BB2-03S2C-60;
- 3D time-of-flight camera SR4000 3D.

Automated organisation of a photo collection by content similarity

TEACHING

- **Introduction to computer science**, Pharmaceutical Sciences, 1st year Bachelor, 14h. course and 28h. practical work, approx. 40 students. 2 ECTS.
- **Applied cybernetics**, Computer Science, Master, with Prof. C. Pellegrini and Dr. E. Bruno, 56h. course, 56h practical work, approx. 10 students. This course ends with a Lego Mindstorm robotcup competition which involves participants from several Universities and from the Geneva University of Applied Sciences. 8 ECTS.
- **Introduction to computer science**, Biology, 2nd year Bachelor, 28h. course and 2 x 56h. practical work, approx. 40 students. 6 ECTS.
- **Digital image processing and synthesis**, Computer Science, 3rd year Bachelor, optional for Master and postgraduate students, 56h. course and 56h. practical work, approx. 15 students. 8 ECTS.
- **Avanced image processing**, Computer Science, Master, postgrades, 28h. course and 28h. practical work, approx. 8 students.
- **Elements of information theory**, Computer Science, 2nd year Bachelor, Master, postgrades, 28h. course and 28h. practical work, approx. 25 students.
- **Multimedia security**, Computer Science, Master, postgrades, 28h. course and 28h. practical work, approx. 8 students.
- **Multimedia Information Retrieval**, Computer Science, Master, postgrades, 28h. course and 28h. practical work, approx. 14 students.
- **Elements of multiuser information theory and wireless communications**, Science, Master, postgrades, 28h. course and 28h. practical work, approx. 10 students.
- **Data Structures**, Computer Science, 1st year Bachelor, 56h. course and 56h. lab work, approx. 20 students.
- **Hands-on Programming (practical complement to Data Structures)**, 1st year Bachelor. 56h Practical work, 20 students.
- **Computer Science Project**, Computer Science, 3rd year Bachelor, 28h course and 56h. lab work, approx. 10 students.
- **Industrial Internships**, Summer Semester (3 months supervision), 5 students.
- **Weekly Computer Vision and Multimedia seminars**, graduate students and senior researchers, 1h. per week, about 15 PhD students, post-docs, seniors, visitors.

Geneva Artificial Intelligence Laboratory

Prof. Christian Pellegrini

cui.unige.ch/AI-group

DOMAIN ACTIVITIES

The Geneva Artificial Intelligence Laboratory (GAIL) was established in 1980 to conduct research in both theoretical and applied artificial intelligence. Past research projects have dealt with the theory of knowledge representation and reasoning mechanisms, theoretical aspects of hybrid neuro-symbolic systems, knowledge representation and interpretation for various artificial neural network (ANN) architectures, new learning algorithms, metalearning for algorithm and model selection, and text mining.

A team led by Melanie Hilario focuses on advanced machine learning and data mining techniques, including learning from complex representations, multiple kernel learning, semantic kernels, and the extensive use of prior knowledge in learning (e.g. development and use of data mining ontologies for workflow optimization and meta-mining). These techniques are applied to various problems in the life sciences (bioinformatics), such as the processing and classification of mass spectra, disease biomarker discovery, pathway modelling, and biological text mining.

A team led by James Henderson investigates techniques such as learning for structures and latent variable models, and applies them to tasks in natural language processing, including syntactic parsing, joint syntactic-semantic parsing, spoken language understanding, and dialogue system architectures. The latter team collaborates closely with the Laboratoire d'Analyse et de Technologie du Langage (LATL) via the interdisciplinary sub-group Computational Learning and Computational Linguistics (CLCL) (<http://clcl.unige.ch>).

FUNDED RESEARCH PROJECTS

Participation to European projects

CLASSIC

Computational Learning in Adaptive Systems for Spoken Conversation

EU ICT FP7

Partners: University of Edinburgh (coordinator), Cambridge University, Ecole Supérieure d'Électricité (Metz), France Telecom.

Period: March 2008 – February 2011

Website: <http://www.classic-project.org/>

DROP-TOP

Integration of DNA, RNA and protein markers in a tool for the prognosis and diagnosis of human disease

FP6 037739

Partners: Progenika (Spain, Coordinator), Institut Curie-CNRS (France), Institut Municipal de Investigacio Medica (Spain), Genewave (France), University of Geneva (Switzerland), University Cyril and Methodius-Faculty of Medicine (FYR-Macedonia), Deutsches Krebsforschungszentrum (Germany)

Period: January 2007 – December 2009

Website: http://www.progenika.com/eu/index.php?option=com_content&task=view&id=233&Itemid=329&lang=en

DebugIT

Detecting and Eliminating Bacteria Using Information Technology

Large-scale integrating project

FP7

Partners: Agfa HealthCare (Belgium, Coordinator), Empirica (Germany), Gama Sofia Ltd. (Bulgaria), Institut National de la Santé et de la Recherche Médicale (France), IZIP (Czech Republic), Linköping University (Sweden), Technological Educational Institute of Lamia (Greece), University College London (UK), Hôpital Universitaire de Genève (Switzerland), University Medical Center Freiburg (Germany)

Period: January 2008 – December 2011

Website: <http://www.debugit.eu/>

e-LICO

An e-Laboratory for Interdisciplinary Collaborative Research in Data Mining and Data-Intensive Sciences

EU FP7 ICT-INF SO STREP: Intelligent content and semantics.

Partners: University of Geneva (Switzerland, Coordinator: Melanie Hilario), Institut national de la santé et de la recherche médicale (France), Medice Oy (Finland), National Hellenic Research Foundation (Greece), Rapid-I GmbH (Germany), University of Manchester (United Kingdom), University of Zurich (Switzerland).

Period: February 2009 – January 2012

Website: <http://www.e-LICO.eu/>

EuroKUP

Kidney and Urine Proteomics.

Cost Action BM0702

Partners: Biomedical Research Foundation, Academy of Athens (Greece, Coordinator), Mario Negri Institute for Pharmacological Research, Bergamo (IT), University of Manchester (UK), National Centre for Sensor Research/BioAnalytical Sciences (IE), INSERM U858, Renal and Cardiac Remodeling, Toulouse (FR), The Linnaeus Centre for Bioinformatics, Uppsala University / SLU, and others from 15 countries that signed the Memorandum of Understanding.

Period: May 2008 – April 2011

Website: <http://www.eurokup.org/>

Participation to National projects

An Adaptive Framework for Learning over Composite Representations

FNRS Project

Period: October 2008 – September 2010

Sampling and Regularization for Latent Structure Models with Feature Induction

FNRS Project

Period: October 2009 – August 2011

Firmenich

Period: September 2009 – January 2010

TEACHING

- **Introduction to algorithms**, Computer Science, Bachelor, 8 ECTS, 140 hours.
- **Introduction to Artificial Intelligence**, Computer Science, Bachelor, 8 ECTS, 112 hours.
- **Data Mining**, Computer Science, Master, 8 ECTS, 52 hours
- Christian Pellegrini and Adam Woznica also participate in the following courses: **Applied Cybernetics** (prof. T. Pun), **Heuristic Methods of Learning and Optimization** (prof. B. Chopard and M. Tomassini), **Object-Oriented Concepts and Languages** (prof. P. Dugerdil).
- Other: Machine Learning reading group, open to all CUI PhD students, postdocs, and other researchers. Met every other week, Autumn 2009.
- Other: Graduate Student Seminar. Talks by CUI PhD students. Met every other week, Autumn 2009.

DOMAIN ACTIVITIES

The main research themes of the ISI group are knowledge representation, from formal logical representations to natural language representations, and knowledge access through various kinds of interfaces such as 3D scenes, hyperbooks, spatial hypertexts, natural language queries, etc. In addition to basic research, the group is involved in applied multidisciplinary research projects related to architecture, archaeology, and sustainable urban development.

Current research directions of the ISI group include:

- models and tools to develop and maintain multi-point of view ontologies
- modelling and management of heterogeneous terminological, ontological and linguistic knowledge resources
- the semantic and rhetoric annotation and retrieval of text
- the formal representation of architectural knowledge and the development of knowledge-based systems for architectural design
- the specification of spatial hypertext views on knowledge bases
- usability evaluation of representation techniques for semantic information in 3D virtual environments

Laboratory for the Analysis and Technology of Language

Prof. Eric Wehrli

www.latl.unige.ch

DOMAIN ACTIVITIES

The LATL develops research, prototypes, and open source software for several facets of natural language processing. The main areas of research are automatic analysis of sentence structure (parsing) and its meaning, and the development of lexicons and dictionaries. Parsing is at the core of several applications: text-to-speech synthesis, terminological extraction, computer-assisted language learning, text mining, and machine translation. This goal is pursued through the two main methodologies available today: the development of large-scale and robust grammar-based systems and the development of adaptive systems that learn from large amounts of data. The systems developed at LATL span several languages: French, English, German, Italian, and other languages are underway (Greek, Spanish, Japanese, Arabic, Czech, Chinese, and Catalan). The LATL group collaborates closely with the AI group (clcl.unige.ch) in the development of adaptive data-driven systems for several parsing-based tasks, such as investigations of shallow levels of meaning representations and spoken-language understanding for dialogue systems. It is also involved in speech processing, specifically, in automatic segmentation, prosody and speaking style modelling.

FUNDED RESEARCH PROJECTS

Participation to European projects

CLASSIC

Computational Learning in Adaptive Systems for Spoken Conversation

Period: March 2008 - February 2011.

Partners: University of Edinburgh (coordinator), Cambridge University, Ecole Supérieure d'Électricité (Metz), France Telecom.

Web Site: <http://www.classic-project.org/>

Participation to National projects

Développement d'un modèle plurilingue de traitement des langues naturelles

SNFS 100012-103999

Period: July 2008 – June 2010

Learning Verb Meaning with Hidden Grammars

Swiss National Science Foundation, grant no. 11-114044

Period: 2006 - 2009

Corpus-based Explorations of Cross-Linguistic Syntactic and Semantic Parallelism

Swiss NSF, grant no. 11-114044

Period: 2008 - 2011

Co-PI - Improving the coherence of machine translation output by modelling inter-sentential relations

Swiss NSF SINERGIA project

Period: 2009 - 2012

Partners: University of Geneva (Lettres and Sciences), IDIAP

Co-PI CADMOS project (Center for Advanced Modeling Science) Machine Translation.

TECHNOLOGY TRANSFER

LATL.ch is a technology start-up specialized in the development of linguistic software components. Closely associated with LATL laboratory, LATL.ch develops and commercializes products based on fundamental research conducted in the university lab. Two companies involved in Speech synthesis use its phonetiser: Acapela Group, a European group, and SVOX, a start-up located in Zürich.

OTHERS

Honours and scientific awards

- Yves Scherrer - Swiss National Fund Fellowship for Prospective Researchers. Visiting scholar at the Center for Computational Learning Systems, Columbia University, New York. September 2009 - June 2010.
- Eric Wehrli, Best presentation award, International Multiconference on Computer Science and Information Technology, Mragowo, Poland, Workshop «Computational Linguistics – Applications» (CLA'10), session «Use of NLP Tools In practical application», October 2009.

Refereeing

- ACL 2008 – Machine Learning and Semantics Sections; Journals: Computational Linguistics, Natural Language Engineering, “Language Resources and Evaluation”

Dissemination

- Portes ouvertes aux collégiens: Word similarity demo, Dialogue system demo, Parsing demo.

DOMAIN ACTIVITIES

The domain of Information System is so exciting that we find a real pleasure to work in this area. Furthermore its utility and its pertinence are now well identified in the world of activities. Nevertheless, an information system becomes larger and larger because of the increasing number of information technologies and because of the huge number of situations where IS are considered as mandatory.

So, now the most important focus is to consider the added value, which is underlying the information systems. Then a new Science is emerging, which was in infancy in the Information system domain: the Services Science. This term was introduced by IBM in 2002. In our approach, we consider service as a mix of informatics, information, regulation, activities, governance, around a cognitive unity and identity.

That's great because this domain is open to interdisciplinary approaches in order to create a transdisciplinary service, which adds value to every discipline and which has its own value. It requires agile approach, evolution capabilities to support innovation processes.

Our research is focused mainly on service engineering in different aspects:

- ontology and regulation with the ontology system KSTERIX;
- innovation process in the domain of e-government;
- formal approach of services;
- integration of services into an information system.

DOMAIN ACTIVITIES

MIRALab was founded in 1989 by Professor Nadia Magnenat-Thalmann and brings together about 25 researchers from different fields, such as computer science, mathematics, medical field, design, architecture, fashion design, cognitive science, etc. This truly interdisciplinary group works in the field of computer graphics, computer animation and virtual worlds. Since 1992 the team has participated in more than 30 European Projects. In 2009, MIRALab was working on the following projects: 3D ANATOMICAL HUMAN, CALVIN, CO-ME, FOCUS K 3D, FNRS, FRANCOFONIE, INDIGO, INTER-MEDIA, LEAPFROG IP, PLAYMANCER and SERVIVE, as well as in International conferences, often organised in Switzerland by MIRALab.

INTERNATIONAL AND NATIONAL ADVISORY COMMITTEES

- 2009: Member of the Evaluation Interdisciplinary Committee of Government of Quebec, (CEM), February 5-6, 2009, Quebec City, Canada
- 2007-2009: Independent expert for evaluation and research proposals, European Commission, Information Society and Media, Directorate General, Brussels, Belgium.
Invited in the Group of User Centric Media, European Commission, Information Society and Media.
- 2004-2009: Expert to Assess Grants Proposal for Research Grants Council, Hong Kong, China
- 2003-2009: Expert for National grants, University of Singapore.
- 2002- Present: Member of the Strategic Advisory Board Committee, City University, Hong Kong, China.
- 2000- Present: Member of the “3ème cycle romand d’informatique”, Conférence universitaire de la Suisse occidentale (CUSO), Switzerland.
- 1994- Present: President of the Computer Graphics Association (CGS)

INVITED TALKS AND KEYNOTES

- Modelling Socially Intelligent Virtual Humans, VRCAI (Virtual-Reality Continuum and its applications in Industry) organized by ACM SIGGRAPH, Yokohama, Japan, December 14, 2009.
- Towards truly-Centric Convergence of Multimedia, UC-MEDIA09 (User Centric Media) organized by ICT, Venice, Italy, December 9, 2009.
- Emotional Humans and Social Robots for Interactive Games applications MIG09 (Motion in Games Conference), organized by University of Twente, Zeist, Holland, November 22, 2009.
- Hair, Cloth and Soft Tissues : The influence of Mechanical Properties on the Real-time Dynamics of deformable objects, VRIPHYS’2009 (Virtual Reality Interaction and Physical Simulation), organized by Eurographics Association, Karlsruhe, Germany, November 5, 2009.
- Virtual Humans in Serious Games, Cyberworlds Conference, organized by IEEE, Bradford, England, 7 September 2009.
- Physical Behavior of Deformable Hair and Clothes: What is Common? CAD/Graphics’2009 Conference (computer-Aided Design and Computer Graphics), organized by IEEE, Yellow Mountain, China, August 19, 2009.
- Wireless Sensor Networks and Cooperating Objects, workshop organized by the Fraunhofer Institute, Darmstadt, Germany, Friday March 13, 2009.
- L’infographie à la découverte du corps humain, organized by the University of Geneva Hospital, Geneva, Switzerland, February 3, 2009
- Virtual Humans and Virtual Worlds : Past, Present, Future, presentation for the obtention of the doctor honoris causa In natural Sciences, University of Hanover, Hannover, Germany, January 22, 2009
- INTERMEDIA PROJECT : Avenues of Research, Multimedia Modeling (MMM’2009) in Sofia Antipolis, Nice, France, Friday, January 9, 2009

FUNDED RESEARCH PROJECTS

Participation to European projects

SERVIVE

«SERVice oriented Intelligent Value adding nEtnetwork for Clothing-SMEs embarking in Mass-Customization»

Period : September 2008 - August 2011

Partners: 15 partners (Adidas AG – Germany, Athens Technology Center – Greece, Customax – Netherlands, Digital Humans – Switzerland, Hohenstein Institute – Germany, Institut français du textile et de l’habillement – France, MIRALab, University of Geneva – Switzerland, National Center of Science and Research «Demokritos» – Greece, Nottingham Trent University - Great Britain, RWTH-Aachen – Germany, Silva & Sistelo SA – Portugal, StudioDemetra – Italy, Team Colours Ltd. – Great Britain, The University of Arts London – Great Britain, Unicum – Germany)

PLAYMANCER

«Serious Gaming 3D Environment»

Period : November 2007 - October 2010

Website: <http://www.playmancer.eu>

Partners: 8 partners (Systema Technologies S.A. – Greece, Netunion s.a.r.l. – Switzerland, University of Patras, The Wire Communications Laboratory – Greece, Technische Universitaet Wien – Austria, Fundacio privada institut d’investigacio biomedica de bellvitge – Spain, MIRALab, University of Geneva – Switzerland, National Center of Science and Research «Demokritos» – Greece, Serious Games Interactive (SGI) – Denmark, Roessingh Research Development BV (RRD) - Netherlands)

FOCUSK3D

«FOster the Comprehension, adoption and USE of Knowledge intensive technologies for coding and sharing 3D media content in consolidated and emerging application communities»

Period : March 2008 - February 2010

Website : <http://focusk3d.eu/>

Partners: 9 partners (C.N.R. – Istituto di Matematica Applicata e Tecnologie Informatiche – Dept. Of Genova – Italy, Center for Research and Technology - Thessaly - Laboratory for Information Technology , Systems and Services (LITSS) – Greece, Ecole Polytechnique Fédérale de Lausanne, Virtual Reality Laboratory (VRLab) – Switzerland, INRIA – France, Max-Planck-Institut für Informatik – Germany, MIRALab, University of Geneva – Switzerland, Stiftelsen for industriell og teknisk forskning ved Norges Tekniske Høgskole – Norway, Utrecht University – Netherlands)

INDIGO

«Interaction with Personality and Dialogue Enabled Robots»

Period: February 2007- July 2009

Website: <http://www.ics.forth.gr/indigo/>

Partners: 9 partners (Acapela Group - Belgium, Albert-Ludwigs University of Freiburg - Germany, Athens University of Economics and Business - Greece, Foundation for Research & Technology - Hellas Institute of Computer Science - Greece, Foundation of the Hellenic World - Greece, Hanson Robotics - U.S., National Centre for Scientific Research «Demokritos» - Greece, Neobotix / GPS - Germany, University of Edinburgh - United Kingdom

FRANCOPHONIE

«Accès au patrimoine vestimentaire contemporain et traditionnel francophone»

Period: December 2006 - September 2009

Type: Fonds Francophone des Inforoutes

Partners: Université de Beyrouth - Liban, Musée de Mahdia - Tunisie

INTERMEDIA

«Interactive Media with Personal Networked Devices»

Period: October 2006 – September 2010

Website: <http://intermedia.miralab.unige.ch>

Partners: 16 partners (MIRALab, Université de Genève - Switzerland (coordinator), Interdisciplinair instituut voor BreedbandTechnologie VZW - Belgium, Industrial Systems Institute / Integrated Research Information Society - Greece, Lancaster University - United Kingdom, Rheinisch-Westfälische Technische Hochschule Aachen - Germany, Università degli Studi di Genova - Italy, Fraunhofer Gesellschaft zur Förderung der angewandten Forschung e.V. - Germany, Klagenfurt University - Austria, Ecole Polytechnique Fédérale de Lausanne - Switzerland, Groupe des Ecoles de Télécommunications - France, Information and Communications University - Korea, Intracom S.A. Telecom Solutions - Greece, OFFIS e.V. - Germany, Consiglio Nazionale Delle Ricerche - Italy, Telefónica Investigación y Desarrollo Sociedad Anónima Unipersonal - Spain, Carleton University - Canada)

3DAH - 3D Anatomical Human

«3D Anatomical Functional Models for the Human Musculoskeletal System»

Period : October 2006 – September 2010

Website : <http://3dah.miralab.unige.ch/>

Partners: 8 partners (MIRALab, University of Geneva - Switzerland, Istituti Ortopedici Rizzoli – Italy, University College London – Great Britain, Institut National de Recherche en Informatique et Automatique – France , Visual Computing Group, CRS4 - Italy, Ecole Polytechnique Fédérale de Lausanne – Switzerland, Vrije Universiteit Brussel – Belgium, Center for Sensory-Motor Interaction, Aalborg University - Denmark)

LEAPFROG IP

«Leadership for European Apparel Production From Research along Original Guidelines (Integrated Project)

Period : May 2005 – July 2009

Website : www.leapfrog-eu.org/

Partners: 38 partners (Euratex – Belgium, ANTEX, Angles Textil – Spain, ATC, Athens Technology Center – Greece, Bekleidungsphysiologisches Institut Hohenstein – Germany, D'Appollonia – Italy, DITF- ITV – Germany, ENEA – Italy, IFTH, Institut Français Textile Habillement – France, Lectra S.A. – France, Philipp Moll office for modern sewing technology – Germany, TNO – Netherlands, University of Cambridge, Cavendish Laboratory – Great Britain, MIRALab, University of Geneva – Switzerland, DIMEC, Dipartimento di Meccanica e Costruzione delle Macchine - Università degli Studi di Genova, CENTEXBEL, Wetenschappelijk en Technisch Centrum van de Belgische Textielnijverheid, Grado Zero Espace S.r.l., Angles Textil SA, Ermenegildo Zegna, STAM S.r.l., Università Politecnica delle Marche, Philipp Moll - office for modern sewing technology, LECTRA SA, University of Cambridge, Bivolino.com, Wilhelm Zuleeg GmbH, TXT e-Solutions GmbH, Hugo Boss AG, CSGI - Consorzio per lo Sviluppo dei Sistemi a Grande interfase, Assyst - Gesellschaft für Automatisierung, Software und Systeme GmbH, KUKA-InnoTec GmbH, Groupe Flory SA., Fratelli Piacenza Spa, Browzwear International Ltd., CITEVE - Centro Tecnológico das Industrias Textil e do Vestuário de Portugal, Ten Cate Advanced Textiles by, COLOR WEB GmbH by Peppermint, ROBOT, European Commission

FUNDED RESEARCH PROJECTS

Participation to National projects

CO-ME

«The Computer Aided and Image Guided Medical Interventions»

Period: January 2001 - June 2009

Website: co-me.ch

Partners: 3 main partners (Ecole Polytechnique Fédérale de Lausanne - Switzerland, Hôpital Universitaire de Genève (HUGE) - Switzerland, MIRALab, University of Geneva - Switzerland)

FNRS 2008

«Swiss National Research Foundation Project: Cross-Modal Interaction with Deformable Objects for web publication»

Period : October 2008 - September 2010

Partner: 4 partners (Ecole Polytechnique Fédérale de Lausanne, Computer Vision Laboratory (CVLab) – Switzerland, Ecole Polytechnique Fédérale de Lausanne, Virtual Reality Laboratory (VRLab) – Switzerland, ETHZ Computer Vision Laboratory – Switzerland, MIRALab, University of Geneva – Switzerland)

FNRS 2008b

«Swiss National Research Foundation Project: Aerial Crowd project description for web publication»

Period : October 2008 - September 2010

Partner: 4 partners (Ecole Polytechnique Fédérale de Lausanne, Computer Vision Laboratory (CVLab) – Switzerland, Ecole Polytechnique Fédérale de Lausanne, Virtual Reality Laboratory (VRLab) – Switzerland, ETHZ Computer Vision Laboratory – Switzerland, MIRALab, University of Geneva – Switzerland)

Calvin

«A day in the Life of John Calvin»

Period : June 2008 - October 2009

Main partner: International Museum of the Reformation, Geneva, Switzerland

OTHERS

Honours and scientific awards

- Dr. Honoris Causa in Natural Sciences from the Leibniz University of Hannover on 22nd of January 2009.
- First Medical Prize for a collaboration between medical Doctors and MIRALab researchers, Eurographics 2009. (This year, together with her PhD students and colleagues from Medical Hospital of Geneva, she was awarded the First Medical Prize from Eurographics 2009)

Courses and tutorials

- Eurographics 2009, tutorial given in Real-Time Individualized Virtual Humans, Muenchen, Monday 30, 2009
- Eurographics 2009, tutorial organized and given in 3D Anatomical Modelling and Simulation Concepts, Muenchen, Tuesday 31, 2009

Refereeing

- Jury of Ph.D. thesis for New Zealand, France, Sweden, Switzerland and Germany.
- European Union, FP7 Projects, Brussels.
- Research Grants Council of Singapore.
- Natural Sciences and Engineering Research Council of Canada.
- National Science Foundation USA.
- Swiss National Research Foundation.
- Austrian Research Foundation.

- ACM SIGGRAPH, IEEE Transactions on Visualization and Computer Graphics, IEEE Computer Graphics and Applications, IEEE Computer, Communications of ACM, The Visual Computer, Computer Graphics Forum, Computer Vision, Graphics and Image Processing, Presence, International Journal of Human-Computer Studies, Computers and Graphics, cyberworlds conference, ICAART (International Conference on Agents and Artificial Intelligence), Enactive conference, Multimedia Modelling conference, International Conference on Entertainment Computing (ICEC), International Conference on Signal Processing, Image Processing and Pattern Recognition; GRAPP (“International Conference on Computer Graphics Theory and Applications), Conference on Affective Computing and Intelligent Interaction (ACII 2009), EG Workshop on 3D Object Retrieval, IEEE Virtual Reality Conference 2009, Computer Graphics International, CASA conference, SIGGRAPH/EUROGRAPHICS Symposium on Computer Animation, etc

Editorial responsibilities

- Since 2007: Associate Editor-in-chief of the “International Journal of Virtual Reality”, IPI Press, USA.
- Since 2007: Regional Editor of the Journal “Intelligent Decision Technologies”, IOS Press, Netherlands.
- Since 2000: Editor-in-chief of the Journal “The Visual Computer” published by Springer Verlag, Germany.
- Since 1990: Co-founder and Co-editor-in-chief, “Journal of Visualization and Computer Animation”, John Wiley and Sons.
- Since 1987: Associate Editor-in-chief, “The Visual Computer”, Springer Verlag, Heidelberg.
- Since 1995: Editor, Computational Geometry Journal, North Holland.
- Since August 1994: Member of Editorial Board, Journal of Universal Computer Science, Electronic Journal.
- Since 1993: Member of Editorial Board, Journal of Computer Graphics, Russia.

Computer-Generated Films, Live Shows and Exhibitions

- Virtual Hip Joint, Eurographics Medical 1st Prize, 2009
- A day in the Life of John Calvin, Exhibition at the International Museum of the Reformation in Geneva, from April 24th to November 1st 2009
- La danse dans tous ses états, Conference-Exhibition at the University of Geneva for the 450th anniversary of the University, June 13th 2009

TEACHING

MIRALab proposes several Student Internships and Master Thesis for motivated students that are finishing their studies and would like to do a project with us. MIRALab’s thesis are especially focused towards the fields of Computer Animation, Informatics and Multimedia.

SMV

Software Modelling and Verification

Prof. Didier Buchs

smv.unige.ch

Software Modelling and Verification

Prof. Didier Buchs

smv.unige.ch

DOMAIN ACTIVITIES

Developing complex and reliable software systems requires rigorous methods for modelling, designing and verifying them. The SMV lab is involved in designing dedicated formalisms that are semantically well described in order to make analysis of system properties possible, to automatically produce code and to select pertinent test cases. A coherent set of tools has been developed in order to apply our methods to software-intensive systems.

We are currently studying :

1. development of techniques for distributed object-oriented and reconfigurable system modelling
2. test selection techniques and model checking based on decision diagrams
3. software prototyping and GUI generation
4. model engineering (MDA,UML, model transformation)

Scientific and Parallel Computing

Prof. Bastien Chopard

spc.unige.ch

DOMAIN ACTIVITIES

One main research activity concerns the study of complex systems, in particular the development of new numerical methods to model and simulate phenomena in natural sciences, economics, social systems and bio-medical applications. Cellular automata, Lattice Boltzmann and multi-agent techniques are central tools to address these questions. Parallel programs and algorithms are developed to implement the simulation on large PC clusters, supercomputers or GPUs to discover, explain or reproduce new phenomena.

Recent activities have focused on developing a new methodology and a new software infrastructure to solve challenging multiscale applications, in particular in biomedical problems.

Another domain of activity is bioinformatics, in collaboration with Swiss Institute of Bioinformatics. New classification methods and algorithm techniques are developed to analyse various biological problems. For instance a complex networks approach is currently developed, in order to understand the differences between healthy and unhealthy systems.

Prof. José Rolim

DOMAIN ACTIVITIES

The TCS-Sensor Lab (theoretical Computer Science and Sensor Networks Lab) main research activities are in large measure concerned with the representation, transformation and communication properties of information systems such as ad-hoc, sensor networks and embedded systems. A certain body of knowledge emphasizing the interweaving themes of complexity and algorithms represent the research axis of theoretical computer science. Under complexity one includes questions which tasks can or cannot be performed by information systems of different aspects restricted in several resources such as running time, memory amount, energy dissipation or communication transmission. Under algorithm one includes questions regarding how efficient a task can be performed in term of such resources. These questions are often addressed by developing models of relevant parts of information systems such as processors, their interconnections, their rules of operation, the means of communication, etc, and by the study of properties of such models.

INTERNATIONAL AND NATIONAL ADVISORY COMMITTEES

- Sarit - Swiss Association for Research in Information Technology - member of the board: Professor José Rolim
- Institut Universitaire de France - 2009 - expert for Computer Science : Professor José Rolim

CONFERENCE ORGANIZATION AS CHAIR OR CO-CHAIR

- 12th Intl. Workshop on Approximation Algorithms for Combinatorial Optimization Problems - APPROX 2009, 21-23 August 2009, HP Auditorium UC Berkeley, USA - chair: Professor José Rolim
- 13th Intl. Workshop on Randomization and Computation - RANDOM 2009, 21-23 August 2009, HP Auditorium UC Berkeley, USA - chair Professor Jose Rolim
- 5th IEEE International Conference on Distributed Computing in Sensor Systems (DCOSS '09)- Marina Del Rey, California, USA - Monday, June 8 - Wednesday, June 10, 2009.- steering committee chair: Professor Jose Rolim
- 8th International Symposium on Experimental Algorithms. June, 3-6, 2009, Dortmund, Germany. SEA 2009 - steering committee chair: Professor Jose rolim

MEMBER OF CONFERENCE PROGRAM COMMITTEES

- 23rd IEEE International Parallel and Distributed Processing Symposium -IPDPS 2009. Monday, 25 May to Friday, 29 May -Rome, Italy- steering committee member - Professor Jose Rolim
- 5th International Workshop on Algorithmic Aspects of Wireless Sensor Networks - Algosensors 2009 - July 10th -11th 2009, Rhodes, Greece in conjunction with ICALP 2009. steering committee member and program committee member - Professor Jose Rolim
- FCT 2009 -17th International Symposium on Fundamentals of Computation Theory, September 2-4, 2009, Wrocław, Poland - Program committee member Professor Jose Rolim
- ICALP 2009 - 36th International Colloquium on Automata, Languages and Programming. Rhodes, Greece; July 5-12. Program committee member - track C: Professor José Rolim
- 15th International Conference on Parallel and Distributed Systems (ICPADS'09), Dec. 8~11, Shenzhen, China- Program committee member - track C: Professor José Rolim
- IPDPS 2009 TCPP PhD Forum – 23th IEEE International Parallel & Distributed Processing Symposium TCPP PhD Forum, Rome, Italy, May 23-29, 2009 – Program Committee: Pierre Leone
- IADIS International Conference on Wireless Applications and Computing, Algarbe, Portugal, 17-19 June 2009: Program Committee: Pierre Leone
- ICETE 2009- IEEE 7th International Joint Conference on e-Business and Telecommunications - July 7-10, 2009 - Milan, Italy, Program committee member: Jose Rolim

INVITED TALKS

- «Efficient Tracking of Moving Targets by Passively Handling Traces in Sensor Networks», Jose Rolim (UNIGE) - General Assembly Meeting Fronts - Bertinoro, Italy, January 22-23, 2009: Professor José Rolim
- FRONTS 2nd Winter School - Invited talk on Tracking - Braunschweig, Germany, October 12-16, 2009: Professor José Rolim

FUNDED RESEARCH PROJECTS

Participation to European projects

AEOLUS

Algorithmic Principles for Building Efficient Overlay Computers
UE6 – 015964
Period: September 2005 – February 2009

FRONTS

Foundations of Adaptive Networked Societies of Tiny Artefacts
UE7 – 215270
Period: February 2008 – January 2011

WISEBED

Wireless Sensor Network Testbeds
UE7 – 224460
Period: June 2008 – May 2011

Participation to National projects

Power Aware Computing in Embedded Systems

FNRS 200020-116084
Period: May 2007 – April 2009

Power Aware Computing in Embedded Systems

FNRS 200020-124396
Period: May 2009 – April 2010

OTHERS

- Member of the Editorial Board of International Journal of Distributed Sensor Networks, Taylor and Francis Publisher: Professor José Rolim
- Member of the Editorial Board of the Journal “Algorithms”, MDPI Publisher: Pierre Leone
- IIIème cycle romand d’informatique, Organization of the seminar “ Programming multicore Computers”, in collaboration with Professors Bastien Chopard (Unige), Pascal Felber (Unige), Speakers Doug Binks (Intel), Tim Harris (Microsoft Research), Alex Duran (UPC): Pierre Leone

TEACHING

- **Distributed Algorithms for Wireless Sensor Networks**, Computer Science, Master, 4 ECTS, 80 hours
- **Langages Formels**, Computer Science, 3 ECTS, Bachelor, 80 hours
- **Calculabilité et Complexité**, Computer Science, 4 ECTS, Bachelor, 80 hours
- **Cryptographie**, Computer Science, 4 ECTS, Bachelor, 80 hours
- **Algorithmique**, Computer Science, Bachelor, 4 ECTS, 80 hours, in collaboration with Bastien Chopard
- **Algorithmique pour le web**, Computer Science, 4 ECTS, Master, 80 hours
- **Introduction à l’informatique pour les biologistes**, Computer Science, 160 hours
- **Elements of multiuser information theory and wireless communications**, Computer Science, 6 ECTS, 120 hours, in collaboration with Sviatoslav Voloshynovskyy and Oleksiy Koval
- **Programmation des systemes**, Computer Science, 4 ECTS, Bachelor, 80 hours
- **Réseaux**, Computer Science, 4 ECTS, Bachelor, 160 hours
- **Seminaire avancé TCSensor**, Computer Science, Doctoral course, 80 hours

Administrative Staff

The administrative staff of CUI is dedicated to serving at its best the community of researchers, teachers and students. Essentially covering four domains :

Administration: Its role is to manage the CUI budget, logistics, communication, etc. It also manages the Web site, the production of documents (activity report, flyers, etc.) as well as the organization and coordination of public and promotional events such as the book and student fair (Salon du Livre et de l'Etudiant)

- **Elie Zagury** is direction assistant;

Secretariat: Works at the departments level of CUI. Hiring and contract renewals of doctoral students as well as all the tasks related to CUI operations are handled by the secretariat. It also provides a perfect connection to major University services such as HR, accounting, etc.

- **Germaine Gusthiot** is administrative assistant;
- **Marie-France Culebras** is secretary;
- **Anne-Isabelle Giuntini** is part-time secretary (50%);
- **Céline Marleix-Bardeau** is part-time secretary (50%).

Administrative Staff in 2008: Nicolas Mayencourt, Marie-France Culebras, Daniel Agulleiro, Céline Marleix-Bardeau, Germaine Gusthiot, Anne-Isabelle Giuntini, Dorothee Hauser, Amélia Bossard, Elie Zagury. Photography by Mélanie Montagnol

IT: Two systems-engineers manage the basic computer infrastructure of CUI (data storage, backups, servers, network, etc.) using Linux and Windows. Their help and support is appreciated daily by the whole CUI community. This service works closely with the University IT Division.

- **Nicolas Mayencourt** is system-engineer;
- **Daniel Agulleiro** is system-engineer;

Library: The CUI Library provides services and tasks as any specialized library of an university center. It is part of the library network of the University of Geneva (<http://www.unige.ch/biblio/sciences/infos/cui.html>) and is proud to offer some specificities in its field. Its current collection contains approximately 12'500 books and 110 specialized reviews.

- **Dorothee Hauser** is head librarian;
- **Amélia Bossard** is librarian.

Financial Report

2009

CUI

Staff	CHF 1'004'218.-
• Academic	CHF 281'304.-
• Administrative and Technical	CHF 572'723.-
• Employer's social contributions	CHF 150'191.-
Operating costs - Investment	CHF 163'851.-
Operating costs - Others	CHF 211'000.-
Library	CHF 47'207.-
CUI SUBTOTAL	CHF 1'426'276.-

COMPUTER SCIENCE DEPARTMENT, FACULTY OF SCIENCES

Staff	CHF 3'079'769.-
• Academic	CHF 2'418'419.-
• Administrative and Technical	CHF 156'606.-
• Employer's social contributions	CHF 504'744.-
Operating costs - Investment	CHF 90'000.-
Operating costs - Others	CHF 26'000.-
DEPARTMENT SUBTOTAL	CHF 3'195'769.-

INFORMATION SYSTEMS DEPARTMENT, FACULTY OF ECONOMIC AND SOCIAL SCIENCES

Staff	CHF 1'933'527.-
• Academic	CHF 1'571'852.-
• Administrative and Technical	CHF 44'771.-
• Employer's social contributions	CHF 316'904.-
Operating costs - Investment	CHF 11'000.-
Operating costs - Others	CHF 6'500.-
DEPARTMENT SUBTOTAL	CHF 1'951'027.-

UNIT OF COMPUTER SCIENCE FOR THE HUMANITIES, FACULTY OF HUMANITIES

Staff - Academic, incl. Charges (estimation)	CHF 670'334.-
Operating costs	CHF 25'000.-
DEPARTMENT SUBTOTAL	CHF 695'334.-

TOTAL BUDGET	CHF 7'268'406.-
---------------------	------------------------

COMPUTER SCIENCE DEPARTMENT, FACULTY OF SCIENCES

UE-funded Projects	CHF 1'496'206.-
Swiss-funded Projects	CHF 1'342'568.-
DEPARTMENT SUBTOTAL	CHF 2'838'774.-

INFORMATION SYSTEMS DEPARTMENT, FACULTY OF ECONOMIC AND SOCIAL SCIENCES

UE-funded Projects	CHF 1'493'314.-
Swiss-funded Projects	CHF 752'521.-
DEPARTMENT SUBTOTAL	CHF 2'245'835.-
